UNIT TEST –II
FLUID MECHANICS-I

SE: CIVIL

DIV. B

SEM: II

Marks:15

Duration : 1Hr

Note :- Attempt 01 specific Question from following as directed during unit test.

Question NO	Question Statement	Level of mapping and Number			Blooms Level	Marks
		CO	PO	PSO		
Q1.	A) Define Atmospheric Pressure, Absolute Pressure, Gauge Pressure & Vacuum Pressure.	CO2	PO1,3,6,10,12	PSO1,2,3	2	05
	B) A simple U-tube manometer is used to measure water pressure in pipeline. The left limb of manometer is connected to the pipe and the right limb is open to atmosphere. The mercury level in the left limb is 95mm below the center of the pipe and the level in the right limb is 235mm above the center of the pipe. Calculate the pressure of water in KN/Sqm and also in meter.					10
Q2	A) Explain with neat sketch Bourdon Tube Gauge.	CO2	PO1,3,6,10,12	PSO1,2,3	2	05
	B) A circular plate 4m dia. Is immersed in oil of sp.gr.0.8 in such a way that its greatest and least depth below the free surface are 5m and 2.5m respectively. The plate is having a concentric circular hole of dia.1.5m. Calculate the total pressure and location of center of pressure on one face of the plate.					10

22/8/2020

Guidelines for Unit Test-1

- Unit test will start from 24th August 2020.
- Attendance is mandatory for Unit Test.
- Internal assessment will be strictly based on unit test performance.
- Test will be of 20 marks based on unit-1.
- Duration of test will be 1 hour; question paper will be uploaded on Google classroom at 11.00 am every day.
- Students should solve all the questions and upload answer sheet before 12.00 noon on Google Classroom.
- Submission after mentioned time will not be accepted.

Note-All students are instructed to join the Google classroom of the respective subject before unit test. Submission on what's app or mail will not be accepted.

DEPARTMENT OF MECHANICAL ENGINEERING

NOTICE

All Final Year Students of Mechanical Engineering Department are hereby informed that **UNIT TEST-I** is scheduled from **24/08/2020 to 28/08/2020** as per the timetable given below.

Time Table for Unit Test- I			
Date	Time	Subject	Duration
24/08/2020	3.00 pm to 4.00 pm	Hydraulic and Pneumatics	1.00 Hr.
25/08/2020	3.00 pm to 4.00 pm	CAD CAM Automation	1.00 Hr.
26/08/2020	3.00 pm to 4.00 pm	Dynamics of Machinery	1.00 Hr.
27/08/2020	3.00 pm to 4.00 pm	Heating Ventilation and Air Conditioning	1.00 Hr.
		Finite Element Analysis	
28/08/2020	3.00 pm to 4.00 pm	Energy Audit and Management	1.00 Hr.
		Automobile Engineering	

Note: Attendance for Unit Test is **compulsory** for all students.

NOTICE

Subject: - Unit Test (Offline) Conduction Sem-II for SE/TE/BE

All the students from SE/TE/BE & faculty members are hereby informed, that Unit Test (Offline) conduction is being scheduled as follows:

Class	Dates	Unit Test No.
BE	21.03.2022 to 22.03.2022	Unit Test-II
TE	23.03.2022 to 24.03.2022	Unit Test-I
SE	24.03.2022 to 26.03.2022	Unit Test-I

The detailed time table is being shared soon. It's mandatory to attend physically for unit test.

(Mr. V.R. Payghan)
Academic Coordinator

MAAC accredited with "A" Grade

Date 26/03/2022

SE- UT-I EXAM NOTICE(offline)

Subject – Schedule of Unit Test- I examination SEM-II (A.Y.2021-22)

All faculty members and students S.E. A, B & C division are hereby noticed that UT-I exam schedule on Unit-1 & Unit-2 for Sem- II (A.Y.2021-22) is as follows.

Sr. No.	Class & Div	Date	Subject	Time
1	SE	29.03.2022	Concrete Technology	09.00 AM-10.00AM
			Project Management	11.00 AM-12.00 PM
2	A, B & C	30.03.2022	Surveying	09.00 AM-10.00AM
3			Geotechnical Engineering	11.00 AM-12.00PM
4			Structural Analysis	09.00 AM-10.00AM
5		31.03.2022		

Venue

Class & Div.	Roll No	Class Room
SE-A	A01-A38	A001
	A39-A58	A115
SE-B	B01-B80	Mechanical Seminar Hall.
SE-C	C1-C50	Mechanical Seminar Hall
	C51-C79	A115

Note-

1. Unit Test exam will be conducted through offline mode with total marks of 30 for each subject.
2. It is mandatory to mention Name, Class/Division and Roll no. on answer sheet.
3. All Student attend the regular classes after Structural Analysis Unit Test Paper on 31.03.2022

NOTICE

Subject: - Unit Test (Offline) Conduction Sem-II for SE/TE/BE

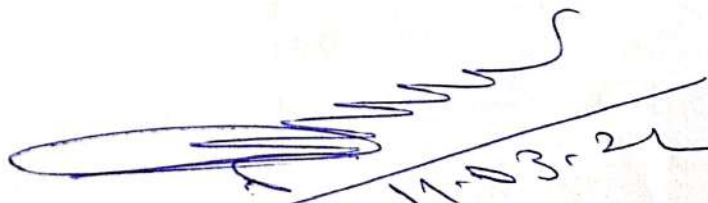

All the students from SE/TE/BE & faculty members are hereby informed, that Unit Test (Offline) conduction is being scheduled as follows:

Class	Dates	Unit Test No.
BE	21.03.2022 to 22.03.2022	Unit Test-II
TE	23.03.2022 to 24.03.2022	Unit Test-I
SE	24.03.2022 to 26.03.2022	Unit Test-I

The detailed time table is being shared soon. It's mandatory to attend physically for unit test.

(Mr. V.R. Payghan)
Academic Coordinator

SE- UT-I EXAM NOTICE(offline)

Subject - Schedule of Unit Test- I examination SEM-II (A.Y.2021-22)

All faculty members and students S.E. A, B & C division are hereby noticed that UT-I exam schedule on Unit-1 & Unit-2 for Sem- II (A.Y.2021-22) is as follows.

Sr. No.	Class & Div	Date	Subject	Time
1	SE A, B & C	29.03.2022	Concrete Technology	09.00 AM-10.00AM
2			Project Management	11.00 AM-12.00 PM
3		30.03.2022	Surveying	09.00 AM-10.00AM
4			Geotechnical Engineering	11.00 AM-12.00PM
5		31.03.2022	Structural Analysis	09.00 AM-10.00AM

Venue

Class & Div.	Roll No	Class Room
SE-A	A01-A38	A001
	A39-A58	A115
SE-B	B01-B80	Mechanical Seminar Hall.
SE-C	C1-C50	Mechanical Seminar Hall
	C51-C79	A115

Date 17/03/2022

TE- UT-I EXAM NOTICE(offline)**Subject – Schedule of Unit Test- I examination SEM-II (A.Y.2021-22)**

All faculty members and students **T.E. A, B & C** division are hereby noticed that UT-I exam schedule on **Unit-1 & Unit-2** for Sem- II (A.Y.2021-22) is as follows.

Sr. No.	Class & Div	Date	Subject	Time
1	TE A, B & C	23.03.2022	Waste Water Engineering	09.00 AM-10.00AM
2			Remote Sensing & GIS	11.00 AM-12.00 PM
3		24.03.2022	Design of Reinforced Concrete Str.	09.00 AM-10.00AM
4			Elective-II	11.00 AM-12.00PM

Venus

Class & Div.	Class Room

Q1 what is risk? what is reactive and proactive strategies?

Q2 write a short note on risk identification risk projection

Q3 what is RMMM? Explain with RMMM plan

Q4 Define software Testing! write objective and testing principle

Q5 Brief white box testing and black box testing

c.

Q1

→ The risk denote the unnecessary event that should not happen. This is called as risk. It can cause heavy loss.

Reactive risk strategy :- In this strategy risk management strategy when project is in trouble necessary action are taken. But when such risk cannot be managed and new risk come one after the other. The software team files the action to solve the problem, in order to correct problems rapidly it is called fire fighting activity.

- resources are utilised to manage such risk if risk does not get manage then the project is in danger. This is an older approach of risk management.

Proactive risk strategy :- In this risk is managed before the technical activities is to be considered. In this potential risk is identified first and then

probability and impact analysis is done.

Q2

(i) Risk identification can be defined as the effort taken to specify threat to the project plan. Risk identification is based on an approach.

1] General risk identification :- It includes potential threat identification to the project specification.

2] Product specification risk identification :- It includes product specific threat identification by understanding people, technology and working environment.

ii] Risk projection :- The risk projection is also called as risk estimation.

There are risk which can be rated

probability that the risk is real

Consequence of problem associated with it.

- Enlist the consequence of the risk

- Estimate the impact of risk on project and product

Q3

→ Rmmm stands for risk mitigation, monitoring and management

The Rmmm plan,

- The Rmmm plan is document in which all the risk analysis activities are described

- sometimes project managers include this document as a part of overall project plan

- sometimes specific Rmmm plan is not created. however each risk can be described individually.

Risk identification sheet

Refinement

Q4

software testing is the process before deployment where software is completely tested and made bug free

There are 2 types of testing

1. white box testing
2. black box testing

✓ Software objectives and principles :-

1. Testing is process of executing a program instead of finding an error

(2) a good test case is one that has probability of finding and undiscovered error.

(3) A successful test is one that uncovers yet undiscovered error.

(4) Testing should begin in small and progress towards large.

(5) Exhaustive testing is not possible.

(6) To be most effective testing should be conducted by third party.

6/

1. Testing is process of executing a program in order to identify errors.

2. Testing is done to find out the errors in the program.

3. Testing is done to find out the errors in the program.

25

→

There are 2 types of testing methods

- ① white box testing
- ② black box testing

o/

~~①~~ ~~②~~

Q.17 Define risk. What is reactive and proactive risk strategies.

→ The risk defines the uncertainty that may occur in the choices due to past actions and not is something that causes heavy losses.

Reactive risk strategy:

- Reactive risk management is a risk management strategy in which when project gets into trouble then only corrective action is taken. But when such risk cannot be managed and new risk comes up one after the other, then software team flies into action in an attempt to correct problems rapidly. These activities are called "Firefighting activities".
- Resources are utilized to manage such risks. And if still the risks do not get managed then project is in danger.
- In this strategy no preventive care is taken about the risks. They are handled only on their occurrence.

→ This is an older approach of risk
They management.

✓ Proactive risk strategy

→ Proactive risk management strategy begins before the technical activity by considering the probable risk.

→ In this strategy potential risks are identified first then their probability and impact is analyzed. Such risks are then specified ascending to their priorities.

✓ Finally, the software team prepares a plan for managing the risks.

→ The objective of this strategy is to avoid the risk. But it is not possible to avoid all risks. Hence, team prepares the risk management plans in such a manner that risk controlling can be done efficiently.

✓ Thus this is an intelligent strategy for risk management and now a day is used by most of IT industries.

Q.27 Write short note on i) Risk identification
ii) Risk projection.

→ i) Risk identification: Risk identification can be defined as the efforts taken to specify threats to the project plan. Risk identification can be done by identifying the known and predictable risks. The risk identification is based on 2 approaches.

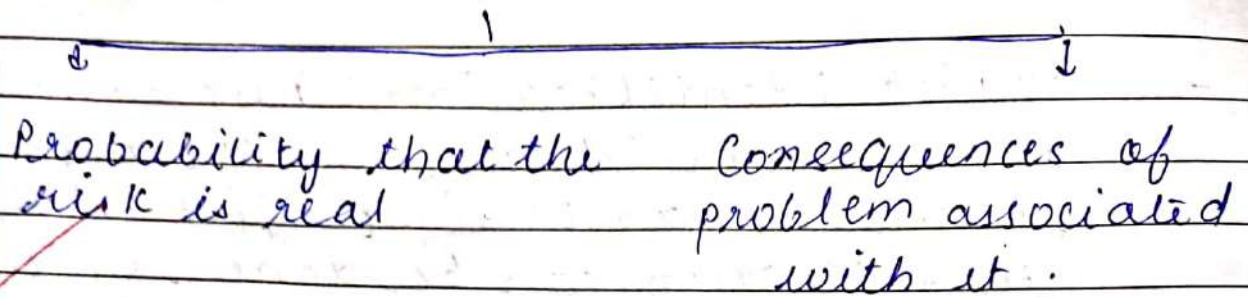

~~1) Risk identifying: Risk identifying can be defined as efforts.~~

1) Generic risk identification: -
It includes potential threat identification to software project.

2) Product-specific risk identification: -
It includes project specific threat identification by understanding people, technology and working environment in which the product gets build.

ii) Risk projection: The risk projection is also called risk estimation.

There are risk by which risk can be rated

The project planner, technical staff, project manager performs following:

- establish a scale that indicates the probability of risk being real
- Enlist the consequences of the risk.
- Estimate the impact of the risk on the project.
- Maintain the overall accuracy of the risk once the risks are prioritized then it becomes easy to allocate the resources for handling them.

Q.3) What is RMMM? Explain

→ RMMM stands for risk mitigation, risk monitoring and management

The RMMM plan:

- The RMMM plan is document in which all the risk analysis activities are described.
- Sometimes project management includes this document in overall project plan.
- Sometimes specific RMMM plan is not created however each risk can be described individually using risk information sheet.
- Typical template for RMMM plan or Risk information sheet can be:

Risk id	Date	Probability	Impact
Origin		Assigned to	
Description			
Refinement context			
Mitigation / Monitoring			
Trigger contingency plan			

The RMMM plan:

- The RMMM plan is document in which all the risk analysis activities are described.
- Sometime project management includes this document in ~~which~~ all overall project plan.
- Sometimes specific RMMM plan is not created however each risk can be described individually using risk information sheet.
- Typical template for RMMM plan or Risk information sheet can be:

Risk id	Date	Probability	Impact
Origin		Assigned to	
Description			
Refinement context			
Mitigation / Monitoring			
Trigger contingency plan			

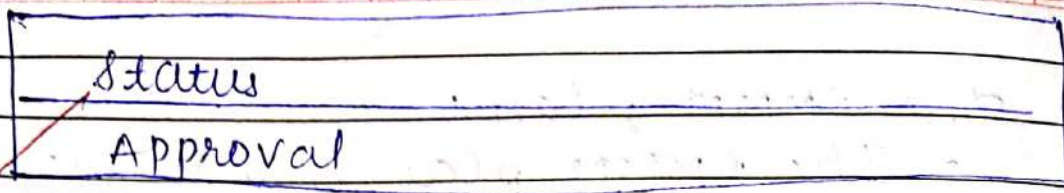

fig: the RMMM Plan

Q.47 Define software testing? Write objectives and testing principles.

→ Software testing :- Software testing is a critical element of software quality of software quality assurance and represent the ultimate review of specification design and coding

Testing objectives :-

- 1) Testing is a process of executing a program with the intend of finding an error.
- 2) A good test case is one that has high probability of finding an undiscovered error.
- 3) A successful test one that uncovers an undiscovered error.
- ✓ The major testing objective is to design tools that systematically uncover types of errors with minimum time and effort.

Testing principles :-

1) All test should be traceable to customer requirements

2) Test should be planned before test begins

3) The pareto principle can be applied to software testing - 80% of all errors uncovered during testing will be traceable to 20% of all programs modules.

4) Testing should begin "in the small" and progress towards testing in large.

5) Exhaustive Testing is not possible

Q.5) Brief White Box testing and Black Box testing

→ There are two general approaches for the software testing

I] Black Box Testing : The black box testing is used to demonstrate that software functions are operational. As the name suggests

in Black box testing, it is possible to test whether the input is accepted properly and output is correctly produced.

The major focus of black box testing is ^{are} functions, operations, external interfaces, external data and information.

2] White Box Testing: In white box testing the procedural details are closely examined. In this testing the internals of software are tested to make sure that they operate according to specifications and design. Thus major focus of white box testing is on internal structures, logic path, control flows, internal data structure condition, loops, etc.

In this method, the procedural design using basic set of execution path is tested. This basic set ~~examines~~ ensures that every execution path will be tested at least once.

4/ ✓

Q1 what is risk? what is reactive and proactive strategies?

Q2 write short note on risk identification risk projection

Q3 what is RMMM? Explain with RMMM plan

Q4 Define software testing write objective and testing principle

Q5 Briefly write about testing and black box testing

C. Write project...

Resources are utilized to manage...
not do it if it can be done...
manage then the...
project is in order...
This is an older approach...
of risk management...

processes are started...
this is a technical...
is considered...
in this protocol...
identified...

Q1

→ The risk denotes the unnecessary event that should not happen. This is called as risk. It can cause heavy loss.

Reactive risk strategy :- In this strategy risk management strategy when project is in trouble necessary action are taken. But when such risk cannot be managed and new risk come one after the other. The software team files the actions to solve the problem, in order to correct problems rapidly it is called fire fighting activity.

- resources are utilised to manage such risk if risk does not get manage then the project is in danger. This is an older approach of risk management.

Proactive risk strategy :- In this risk is managed before the technical activities is to be considered. In this potential risk is identified first and then

probability and impact, and analysis is done.

Q2

(i) Risk identification can be defined the effort taken to specify threat to the project plan

risk identification is based on →
 2 approaches

1] General risk identification :- It includes potential threat identification the project specification

2] Product specification risk identification :- It includes product specific threat identification by understanding people, technology and working environment

ii] Risk projection :- The risk projection is also called as risk estimation

There are risk which can be rated

↓
 probability that the risk is real

Consequence of problem associated with it.

- Enlist the consequence of the risk
- Estimate the impact of risk on project and product

Q3

→ Rmmm stands for risk mitigation, monitoring and management. The Rmmm plan,

- The Rmmm plan is document in which all the risk analysis activities are described

- sometimes project managers include this document as a part of overall project plan

- sometimes specific Rmmm plan is not created. however each risk can be described individually.

Risk identification sheet

project name < enter name of project

Risk id Date Probability Impact

Origin

Assigned to

Description

Refinement

Q4

→

software testing is the process before deployment where software is completely tested and made bug free

There are 2 types of testing

- 1 white box testing
- 2 black box testing

Software objectives and principles :-

1. Testing is process of executing a program instead of finding an error

(2) a good test case is one that has probability of finding undiscovered error.

(3) A successful test is one that uncovers yet undiscovered error

(4) Testing should begin in small and progress towards large.

(5) Exhaustive testing is not possible

(6) To be most effective testing should be conducted by third party.

software testing is the process of checking whether the software is conforming to the requirements and free from bugs.

there are two types of testing: unit testing and integration testing.

software development process is a continuous process of testing. Testing is a process of checking whether the software is conforming to the requirements and free from bugs.

Q5

There are 2 types of testing methods

- ① white box testing
- ② black box testing

Accredited with 'A' grade by NAAC

Department of Electronics and Telecommunication Engineering

UNIT TEST-6

SEM I - 2020-21

Class	Time	Monday 21/12/2020	Tuesday 22/12/2020	Wednesday 23/12/2020	Thursday 24/12/2020	Friday 25/12/2020
SE	11.00 AM - 12.00 NOON	Data Structure	Electronic Circuits	M-III	Digital Circuits	

Class	Time	Monday 21/12/2020	Tuesday 22/12/2020	Wednesday 23/12/2020	Thursday 24/12/2020	Friday 25/12/2020
TE	02.00 PM - 03.00 PM	MECH	DC	EM	DSP	MC

Class	Time	Monday 21/12/2020	Tuesday 22/12/2020	Wednesday 23/12/2020	Thursday 24/12/2020	Friday 25/12/2020
BE	11.00 AM - 12.00 NOON	RMT	CNS	IOT	VLSI DT	AI/EPD

Note:

- Unit test exam will be conducted through online mode with total 20 marks for each subject.
- Syllabus for Examination: Unit 6
- Paper will be uploaded on Google Classroom.

**In-Semester Examination (Sem. - II, AY-2020-21)**

All the students (SE, DSE, TE & BE) are here by informed that the In Semester (Sem. - II 2020-21) examination will be conducted as per the given schedule.

Sr. No.	Date / Day	Time	Class	Subject
1	11/06/2021 Friday	4.00- 5.00PM	SE / DSE	Signals & System
			TE	Power Electronics
			BE	Mobile communication
2	12/06/2021 Saturday	4.00- 5.00PM	SE / DSE	Object oriented Programming
			TE	Advanced Processors
			BE	Broadband Communication System
3	13/06/2021 Sunday	4.00- 5.00PM	SE / DSE	Control System
			TE	Business Management
			BE	Machine Learning / Audio Video Engineering.
4	14/06/2021 Monday	4.00- 5.00PM	SE / DSE	Principles of communication System
			TE	System Programming & Operating Systems
			BE	Data Science & Analytics
5	15/06/2021 Tuesday	4.00- 5.00PM	SE / DSE	-
			TE	Information Theory, coding & Communication Network
			BE	-

Note:

- In-Semester Exam will be conducted through online mode (MCQ Pattern) with total 30 marks for each subject.
- Syllabus for Examination: SE, DSE- Unit 1 & 2.
TE & BE- Unit 1, 2 & 3.
- Link will be shared on the day of examination.

**Department of Civil Engineering**

Our Vision: To be recognized as a leading center in civil engineering education.

Our Mission:

1. To nurture engineering graduates for professional career through dynamic teaching- learning environment.
2. To provide requisite manpower to the society to fulfill varied technical needs through rigorous interaction with industries.

Date: 01/09/2021**NOTICE****Subject: Regarding schedule and preparation of Unit Test 01 of all subjects of Semester-I, AY 2021-22**

All students and faculty members are hereby informed that, schedule of Unit Test 01 for all subjects of Semester-I, AY 2021-22 is as follows.

Sr. No.	Class	07.09.2021		08.09.2021		09.09.2021
		10:30 am	01:00 pm	10:30 am	01:00 pm	10:30 am
01	BE	TRE	EE II	ELE -1	ELE -II	SDD III

[Elective-I – Architecture and town planning /Advance Concrete Technology.

Elective –II- TQM and MIS /Integrated Water Resource and Planning /Earthquake Engineering.]

Note:

1. Question paper should contain 30 MCQs
2. Concern Faculty members must prepare "Question Paper" before 5.09.2021
3. All students must prepare for Unit Test 01 as per above schedule.

BE- UT-I EXAM NOTICE(B.E.)

Subject - Schedule of Unit Test- I examination SEM-II (A.Y.2021-22)

All faculty members and students B.E. A, B & C division are hereby noticed that UT-I exam schedule on **Unit-1 & Unit-2** for Sem- II (A.Y.2021-22) is as follows.

Sr. No.	Class & Div	Date	Subject	Time
1	BE A, B & C	02.02.2022	Dams and hydraulics structures	10.30 AM- 11.30AM
2			Quantity Surveying and Contract and Tenders	01.00 PM- 02.00PM
3		03.02.2022	Elective-III	10.30 AM- 11.30AM
4			Elective-IV	01.00 PM- 02.00PM

Note-

1. Unit Test exam will be conducted through online mode with total marks of 30 for each subject.
2. Exam link will be shared exactly @ schedule time.
3. Duration of exam will be 1 hour. Link will be closed after 1 hour.
4. Student should respond their answer sheets before 1hour and 15 minutes.
5. It is mandatory to mention Name, Email id and Roll no. on answer sheet.

NOTICE

Date: 25/11/2020

DEPARTMENT OF MECHANICAL ENGINEERING

All Final Year Students of Mechanical Engineering Department are hereby informed that **UNIT TEST-III** is scheduled from **07/12/2020 to 11/12/2020** as per the timetable given below.

Time Table for Unit Test- III			
Date	Time	Subject	Duration
07/12/2020	11.00 am to 12.00 pm	Hydraulic and Pneumatics	1.00 Hr.
08/12/2020	11.00 am to 12.00 pm	CAD CAM Automation	1.00 Hr.
09/12/2020	11.00 am to 12.00 pm	Dynamics of Machinery	1.00 Hr.
10/12/2020	11.00 am to 12.00 pm	Heating Ventilation and Air Conditioning	1.00 Hr.
		Finite Element Analysis	
11/12/2020	11.00 am to 12.00 pm	Energy Audit and Management	1.00 Hr.
		Automobile Engineering	

National Assessment & Accreditation Council

Note:

1. Test is compulsory for all students.
2. Test III will be based on Unit 3 and 4.

B.E. (ELECTRONICS & TELECOMMUNICATIONS)

SEMESTER - II

Time - 2.00p.m. to 3.00 p.m.

Day & Date	SUBJECT (2012 Course)
Tuesday, 06.03.2018	Mobile Communication (404189)
Wednesday, 07.03.2018	Broadband Communication Systems (404190)
Thursday, 08.03.2018	Elective - III (404191) a) Speech & Audio Signal Processing b) RF Circuit Design c) Audio Video Engineering d) Soft Computing
Friday, 09.03.2018	Elective - IV -(404192) a) Biomedical Signal Processing b) Nano Electronics & MEMS c) Detection & Estimation Theory d) Wireless Networks e) Open Elective : i) Advanced Automotive Electronics ii) Unified Communications and Contact center Applications iii) Business Analytic and Intelligence iv) Data Science and Analytics v) Industrial Internet of Things

B.E. (ELECTRONICS)

SEMESTER - II

Time - 2.00p.m. to 3.00 p.m.

Day & Date	SUBJECT (2012 Course)
Tuesday, 06.03.2018	Computer Network (404209)
Wednesday, 07.03.2018	Process Automation (404210)
Thursday, 08.03.2018	Elective - III (404211) a) Speech & Audio Signal Processing b) Audio & Video Engineering c) Optical and Microwave Communication d) Soft Computing
Friday, 09.03.2018	Elective - IV (404212) a) Biomedical Signal Processing b) Nano Electronics & MEMS c) System on Chip d) Mechatronics e) Open Elective : i) Advanced Automotive Electronics vi) Data Science and Analytics ii) Industrial Internet of Things

IN SEMESTER- II: TIME 11.00 a.m. To 12.00 noon

Day & Date	T.E. (Civil) (2015 Course)	T.E. (Mechanical) (2015 Course)	T.E. (Mech. S/W) (2015 Course)	T.E. (Automobile) (2015 Course)
Tuesday, 06/03/2018	Advanced Surveying (301007)	Numerical Methods and Optimization * (302047)	---	Numerical Methods and Optimization (302047)
Wednesday, 07/03/2018	Project Management and Engineering Economics (301008)	# Design of Machine Elements-II (302048)	---	# Design of Engine Components (316484)
Thursday, 08/03/2018	Foundation Engineering (301009)	Refrigeration and Air Conditioning (302049)	---	Automotive Transmission (316485)
Friday, 09/03/2018	Structural Design-II (301010)	Mechatronics (302050)	---	Automotive Aerodynamics and body Engineering (316486)
Saturday, 10/03/2018	Environmental Engineering-I (301011)	Manufacturing - Process-II * (302051)	---	Manufacturing Process-II (302051)

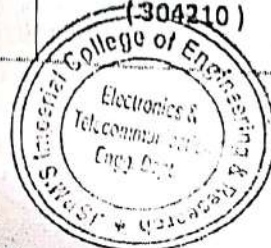

Please note the Timing : (1 Hrs.30 Min.)

* Common with Automobile

IN SEMESTER- II: TIME 11.00 a.m. To 12.00 noon

Day & Date	T.E. (Electrical) (2015 Course)	T.E. (E & Te) (2015 Course)	T.E. (Electronics) (2015 Course)	T.E. (Instru. & Control) (2015 Course)
Tuesday, 06/03/2018	Power System II (303146)	Power Electronics (304186)	DSP and Applications (304206)	Digital Signal Processing (306268)
Wednesday, 07/03/2018	Control System I (303147)	Information Theory, Coding and Communication Networks (304187)	Embedded Processors (304207)	Process Loop Components (306269)
Thursday, 08/03/2018	Utilization of Electrical Energy (303148)	Business Management (304188)	Business Management and Organization (304208)	Unit Operations & Power Plant Instrumentation (306270)
Friday, 09/03/2018	Design of Electrical Machines (303149)	Advanced Processors (306189)	Fundamentals of HDL (304209)	Instrument and System Design (306271)
Saturday, 10/03/2018	Energy Audit and Management (303150)	System Programming and Operating Systems (304190)	PLC and Applications (304210)	Bio- Medical Instrumentation (306272)

To N/B

IN SEMESTER- II: TIME 11.00 A.M. TO 12.00 NOON

Day & Date	T.E. (Civil) (2012 Course)	T.E. (Mechanical) (2012 Course)	T.E. (Mech. S/W) (2012 Course)	T.E. (Automobile) (2012 Course)
Tuesday, 06/03/2018	Advance Surveying (301007)	Numerical Methods & Optimization ** (302047)	-----	Numerical Methods & Optimization ** (302047)
Wednesday, 07/03/2018	Project Management & Engineering Economics (301008)	Design of Machine Elements-II * (302048)	-----	Design of Engine Components * (316484)
Thursday, 08/03/2018	Foundation Engineering (301009)	Turbo Machines (302049)	-----	Automotive Transmission (316485)
Friday, 09/03/2018	Structural Design-II * (301010)	Mechatronics (302050) (Sem I for Mech. S/W)	-----	Automotive Aerodynamics & body Engineering (316486)
Saturday, 10/03/2018	Environmental Engineering-I (301011)	Manufacturing Process - II ** (302051)	-----	Manufacturing Process - II ** (302051)

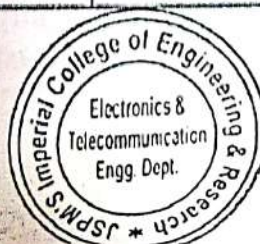

* Please note the Timing : (1 Hrs.30 Min.)

** Common for Mechanical & Automobile branches.

IN SEMESTER- II: TIME 11.00 A.M. TO 12.00 NOON

Day & Date	T.E. (Electrical) (2012 Course)	T.E. (E & Te) (2012 Course)	T.E. (Electronics) (2012 Course)	T.E. (Instru. & Control) (2012 Course)
Tuesday, 06/03/2018	Power Systems-II (303146)	Information Theory & Coding Techniques (304189)	Instrumentation Systems (304209)	Digital Signal Processing (306267)
Wednesday, 07/03/2018	Control System-I (303147)	Antenna & Wave Propagation (304190)	Discrete Time Signal Processing (304210)	Process Loop Components (306268)
Thursday, 08/03/2018	Utilization of Electrical Energy (303148)	Embedded Processors (304191)	Embedded Processors (304211)	Unit Operations & Power Plant Instrumentation (306269)
Friday, 09/03/2018	Design of Electrical Machines (303149)	Industrial Management (304192)	Industrial Management (304213)	Instrument & System Design (306270)
Saturday, 10/03/2018	Energy Audit & Management (303150)	Power Electronics (304193)	Power Electronics & Applications (304212)	Bio-Medical Instrumentation (306271)

*. Please note the Timing : (1 Hrs.30 Min.)

Department of Electronics and Telecommunication Engineering

Date: 2/3/2018

OFFICE ORDER

Subject: - Internal and Expert appointment for online examination (Phase-II).

With above reference and subject following staff members are allotted the duties and responsibilities. This appointment is for online examination starting from 5th March 2018. The schedule is as mentioned below.

Sr. No.	Name of the staff	Duty Assigned	Subject	Date	Signature
01	Prof. P.V. Jadhav	Internal	Engineering Mathematics-III (60)	Monday 05/3/2018	
02	Prof. S. S. Sayyad	Expert			
03	Prof. V. B. Raskar	Internal	Integrated Circuits (60)	Tuesday 06/3/2018	
04	Prof. G. V. Karbhari	Expert			
05	Prof. G. V. Karbhari	Internal	Control System (60)	Wednesday 07/3/2018	
06	Prof. A. S. Deshpande	Expert			
07	Prof. A. S. Deshpande	Internal	Analog Communication (60)	Thursday 08/3/2018	
08	Prof. V. B. Raskar	Expert			
09	Prof. S. S. Sayyad	Internal	Object Oriented Programming (60)	Friday 09/3/2018	
10	Prof. P.V. Jadhav	Expert			
11	Kamble D. S.	Lab. Asst.	All		
12	Ganage K. M.	Lab. Asst.			
13	Yuvraj Shegar	Peon			

Exam In-charge

 Accredited by NAAC with "A" Grade.

Department of Electronics and Telecommunication Engineering

Date: 2/3/2018

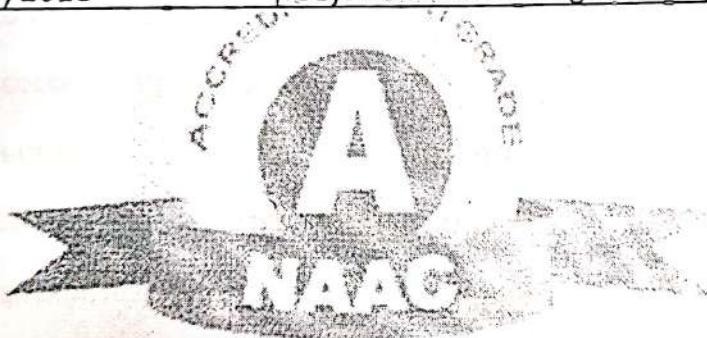

Following is a time table for **Internal MCQ Test-2** conducted for second year.

MCQ Test -2

Semester: II
 Class: SE

Time: 10 am to 10.30 am
 Syllabus: Unit 3 & Unit 4

Day / Date	Subject
Monday, 5/03/2018	Engineering Mathematics - III (EM-III)
Tuesday, 6/03/2018	Integrated Circuits. (IC)
Wednesday, 7/03/2018	Control Systems. (CS)
Thursday, 8/03/2018	Analog Communication (AC)
Friday, 9/03/2018	Object Oriented Programming. (OOP)

Date: 22/1/2018

Following is a time table for **Internal MCQ Test -1** for Second Year.

Semester: II
Class: SE.

Time: 3.45 pm to 4.15 pm.
Syllabus: Unit 1 & Unit 2.

Day / Date	Subject
Monday, 29/01/2018	Integrated Circuits. (IC)
Tuesday, 30/01/2018	Analog Communication. (AC)
Wednesday, 31/01/2018	Object Oriented Programming. (OOP)
Thursday, 1/02/2018	Control Systems. (CS)
Friday, 2/02/2018	Engineering Mathematics - III. (EM-III)

Department of Electronics and Telecommunication Engineering

Assignment No. 1

Maximum marks for Assignment:35 Assignment Declaration Date: 9/1/20

Assignment Submission Date (on or before): 8/1/20

Assignment assessment declaration Date by faculty (on or before: 11/1/20)

Q. No.	Question Statement	Level of mapping and Number			Bloo ms Level	Mark s
		CO	PO	PSO		
Q1	Explain the Principle of Grading to improve Trunking efficiency. Draw a neat diagram.	CO1	PO1-1	PSO1-2 PSO2-2 PSO3-2	2	5
Q2	Calculate availability of a dual processor system for a period of 20 years if its MTBF=3300 Hrs. and MTTR=6 Hrs.	CO1	PO1-2 PO2-1 PO3-1	PSO1-2 PSO2-2 PSO3-1	4	5
Q3	Design two stage switching network for connecting 200 incoming trunks to 200 outgoing trunks & find number of cross points.	CO1	PO1-2 PO2-2 PO3-1	PSO1-2 PSO2-2 PSO3-2	3	5
Q4	Discuss the various types of switching systems	CO1	PO1-1	PSO1-2	2	5
Q5	A group of 5 trunks is offered 2E of traffic .Find i) GOS ,ii) Probability that only one trunk is busy, iii) Probability that only one trunk is free, iv) Probability that atleast one trunk is free.	CO1	PO1-2 PO2-2 PO3-1 PO4-2 PO12-1	PSO1-2 PSO2-1 PSO3-1	4	5
Q6	Design a three stage network that has 100 incoming lines and 300 outgoing trunks Also calculate the total cross points.	CO2, CO3	PO1-2 PO2-2 PO3-1	PSO1-2 PSO2-2 PSO3-2	4	5
Q7	Draw general trunking diagram for a switching system.Explain various functional entities.	CO2, CO3	PO1-2 PO2-2 PO3-1 PO4-2	PSO1-2	3	5

Subject in-charge

HOD

Assignment No. 1

Q1) Explain the structure of C++ program with an example.

Ans1) Structure of C++ program:

Header file declaration section
Global declaration section
Class declaration & method Definition section
Main function
Method function

In the above given structure we can see various section,

- 1st section is header file declaration section it consists of all the required header files
- 2nd is global declaration section, it consists of global variables.
- 3rd section is class declaration & method definition section, classes are declared here & functions / methods are declared inside the class only.

-) Fourth section is a main function, it is nothing but the starting point of the program.
-) Fifth section is method definition section if we don't declare method/function inside class then after the main function all the function are defined.

```
#include <iostream>
using namespace std;
```

```
struct person
```

```
{
```

```
    char name[50];
```

```
    int age;
```

```
    float salary;
```

```
};
```

```
int main()
```

```
{
```

```
    person p1;
```

```
    cout << "Enter full name: ";
```

```
    cin.get(p1.name, 50);
```

```
    cout << "Enter age: ";
```

```
    cin >> p1.age;
```

```
    cout << "Enter salary: ";
```

```
    cin >> p1.salary;
```

```
cout << "\n Displaying Information"
cout << " Name: " << P, name << endl
cout << " Age: " << P, age << endl
cout << " salary: " << P, salary;
```

```
return 0;
```

```
}
```

Q2) Write a short note on selection statement or looping statement.

- Ans) Selection statement —
- 1) If statement is used as control statement.
 - 2) It alters the flow of program execution.
 - 3) It can be implemented as simple if statement or if - - - - else statement.
 - 4) With simple if statement, if condition satisfy then that block of code will be executed.
 - 5) With if - - - - else statement, if condition satisfies then block of statement will be executed or else it will be blocked.

•) if-else example:

```
#include <iostream>
using namespace std;
int main()
{
    int a = 10;
    if (a == 10)
    {
        cout << "\n Given number is 10";
    }
    else
    {
        cout << "\n Given number is not 10";
    }
}
```

return 0;

}

Output : Given number is 10.

-) Looping Statement - 1) It is used to repeat the block of statement.
- 2) Condition is mentioned which decides how many times the block of statement should be executed.
- 3) Looping is possible with -
 - a) for
 - b) while
 - c) Do.....while

-) For Loop - •) It is used to execute certain block of statement for many times.
-) In for loop we can mention loop initialization condition checking and increment/decrement operation.
-) In body of for loop we can write statement which should be executed properly

Syntax :

```
for (initialization; condition; increment/  
decrement)
```

```
{  
  // statements;
```

```
}
```

```
#include <iostream>  
using namespace std;  
int main (-)
```

```
{  
  int i;  
  for (i=0, i<5, i++)
```

```
  cout << "i loop is executing for "<< i << "  
  times;"
```

```
  }  
  return 0;
```

```
}
```

Output :

Loop is executing for 0 time
Loop is executing for 1 time
Loop is executing for 2 time
Loop is executing for 3 time
Loop is executing for 4 time

-) While Loop - It is simple form of for loop. For loop and while loop does the same thing. Only difference betⁿ for & while loop is in syntax. While loop is also used for executing the same block of code for many times.

Syntax :

Initialization;
while (condition)

{
 // statements;
 // increment / decrement;

}

#include <iostream>

using namespace std;

int main ()

{

```
int i;  
i = 0;  
while (i < 5)  
{  
    cout << " | n loop is executing for  
    " << i << " time";  
  
    i++;  
}  
return 0;
```

Output — loop is executing 0 time
loop is executing 1 time
loop is executing 2 time
loop is executing 3 time
loop is executing 4 time

•) Do-while loop — 1) Do while is also same like while statement. The difference between do and while is that in while statement condition is checked before loop execution whereas in do-while condition is checked after loop execution. simply while loop checks condition first whereas do-while checks condition afterwards.

Syntax:

```
Initialization;  
do  
{  
    // statements;  
    // increment / decrement;  
}  
while (condition);
```

```
#include <iostream>  
using namespace std;  
int main ()  
{  
    int i;  
    i = 0;  
    do  
    {  
        cout << "\n loop is executing for " << i << "  
        time";  
        i++;  
    } while (i < 5);  
    return 0;  
}
```

Output - loop is executing 0 time
loop is executing 1 time
loop is executing 2 time
loop is executing 3 time
loop is executing 4 time

Q 3) Write a short note on constructor & its types.

Ans 3) Constructor is used to initialize the objects. It is special function which is automatically called during object creation.

* Types of Constructor -

- 1) Parameterized Constructor - is used to pass the argument to constructor during object creation.
- Passing values can be used for initialization purpose.
- Multiple constructor within class.
- It means that a class can have combination of the default, parameterized etc.
- Constructor with default parameters
- All the rules for the default constructor will be applicable.

2) Copy Constructor - It is used to initialize one object from another object of same type.

• It can be used to copy constructor as to copy an object to pass it as argument to function.

• Copy an object to return it from function

- Default Copy Constructor -

• C++ create default constructor if we don't define it.

• Constructor created by compiler has an empty body. It does not assign default values to data members.

• Compiler also creates a copy constructor if we don't write our own copy constructor.

Q4) Explain Array with an example.

Ans 4) Array is single or multi dimensional Array can be created as follows:

```
int a[10];
```

```
float f[20];
```

```
char c[30];
```

Above statement creates an single dimensional array.

→ Array a is created of size 10 it means we can store 10 different integer number.
Array f will be created of size 20 it means that we can store 20 different floating points members. Array c will be created of size 30 it means we can store 30 different characters.

-) An array can be initialized at the time of creation also

```
int a[5] = { 10, 20, 30, 40, 50 },  
           0  1  2  3  4  
           |10|20|30|40|50|
```

-) 10 will be stored on 0th position 20 on 1st position and so on.

-) Index position of array always start with 0 means index will be 0 to 9 for array with 10 size.

```
#include <iostream>  
using namespace std;  
int main()  
{  
    int a[10],  
    char c[20];
```

`a[0] = 100;` // store value in an array at 0
`a[1] = 200;` // store value in an array at 1 position

`cout << "n element position 0 is " << a[0];`
`cout << "n element position 1 is " << a[1];`

`c[0] = 'a';`
`c[1] = 'b';`

`cout << "n element position 0 is " << c[0];`
`cout << "n element position 1 is " << c[1];`

`return 0;`
`}`

Output - element position 0 is 100
 element position 1 is 200
 element position 0 is a
 element position 1 is b

Q 5) Explain class, object, data member, member function with an example.

- Ans 5) • Class -
- 1) Class is user defined data type.
 - 2) It is used to create new data type
 - 3) Objects are created whose data type is class.
 - 4) It is one of the imp feature of C++
 - 5) class creation consists of two parts.

Class declaration & class function defn

- Class declaration defines types and scope of class members. Behaviour of class is defined by functions.
- Class declaration is similar to structure declaration.
- It starts with class keyword.
- Body of class is enclosed in { } and terminated.
- Generally class name should be meaningful.
- After class declaration, class name becomes new data type.

-) Object — •) Class declaration just creates the template.
-) Until we instantiate class, it is of no use.
-) After class declaration we can create variables of its type.
-) Class variable is known as objects.

* Example of class and object is given below:

```
#include <iostream>
using namespace std;

class amount {
private:
    int account_number;
    float balance;
public:
    void set_value() {
        account_number = 10;
        balance = 100;
    }
    void display() {
        cout << "Account number : " << account_number;
        cout << "\n Balance : " << balance;
    }
}
```

```
}  
  
};  
int main()  
{  
    Account A;  
  
    A.set_value();  
    A.display();  
    return 0;  
}
```

Output - Account number : 10,
Balance : 100

-) Data Member - Data member and member function of class belongs to class scope.
-) In object oriented programming language we use the word access rather than scope.
-) Public member of class are accessible from anywhere in the program.
-) Private member of a class is accessed only through methods of class in which they have defined.

- Protected member of class is accessible to their own class and subclass of that class.
- Member function: They are operators and functions that are declared as members of a class. Member function do not includes operator and functions declared with the friend specifier. These are called as friends of a class. You can declare a member function as static; this is called as static member function.

* There are 5 types of member function —

- 1) Simple functions
- 2) Inline functions
- 3) Friend functions
- 4) Const functions
- 5) Static functions,

Name :- Sayyad Reshma Rajuddin

MBA - I

sub :- Organisational Behaviour

Assignment No-1

①

Define organisational behaviour, scope and importance of OB.

Introduction :-

The study of organisation behaviour is very interesting and challenging. It helps us to study the human behaviour in an organisational setting. Organisational behaviour acts as life and blood of the organisation. It helps us to understand, predict and control our behaviour in the organisation. It is related to individuals and groups. We cannot live in society alone in isolation. It is very important to remember that human factors keep on adding to the productivity.

Meaning :-

Organisational behaviour is the study of human behaviour which helps us to interact and use our knowledge so as to understand how people behave individually in groups and in other settings.

Definition :-

Frederick Luthans :-

"Organisational behaviour is a understanding, predicting, and controlling human behaviour in organisation."

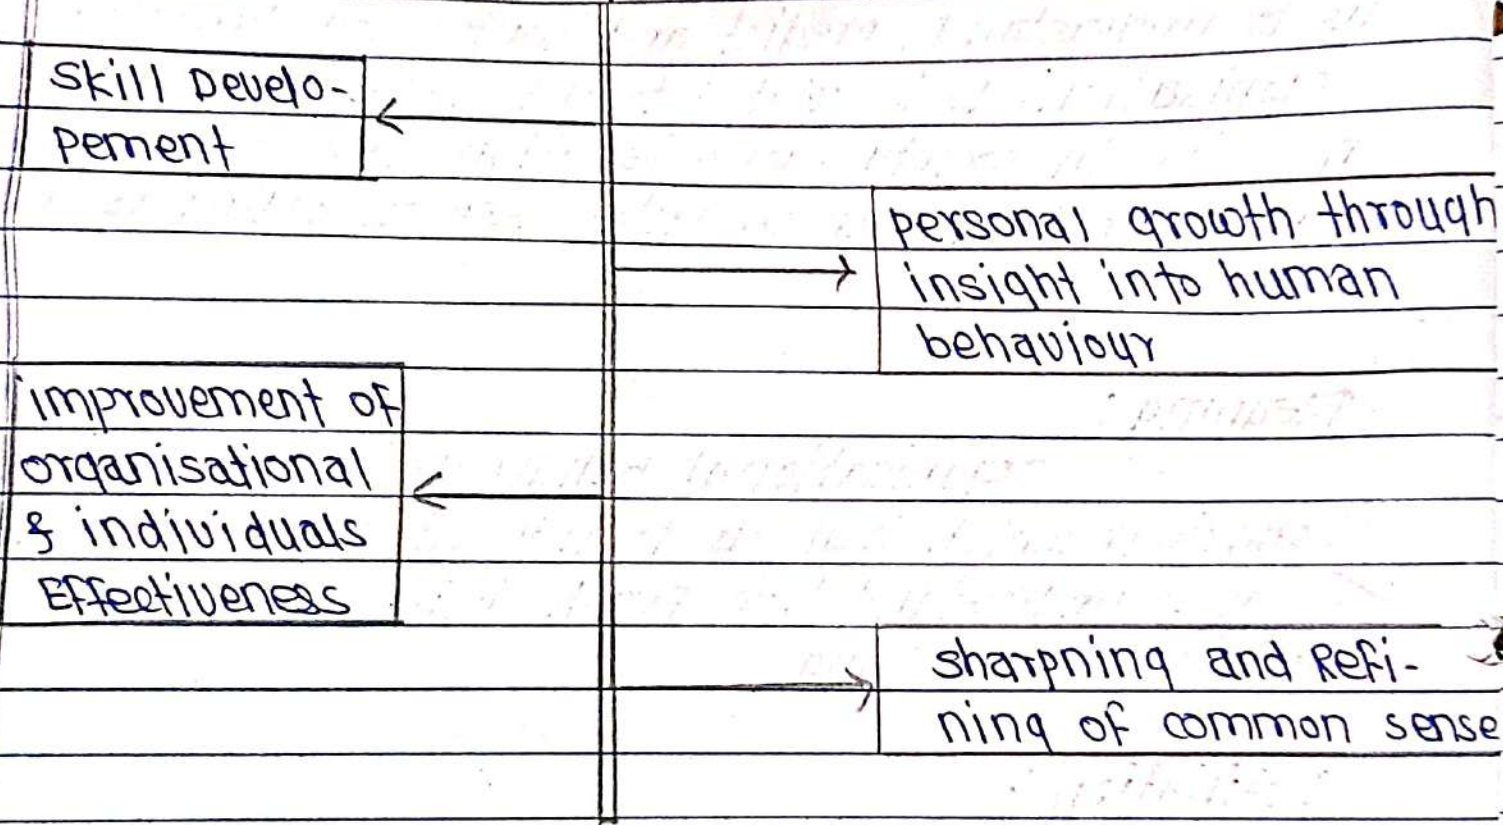

Stephen Robbins :-

"It is a field of study that investigates the impact that individuals, groups and structure have

on behaviour within organisation for the purpose of
ing such knowledge towards improving an organisati
effectiveness."

scope of organisational behaviour

scope

skill Development :-

For entering and surviving in the ne
age, organisation requires certain set of skill i.e. work
related skill and generic skills such as problem solving an
communication skills. organisational behaviour deals direct
with the generic skills. skill related to organisational beh
aviour are gaining momentum in current work scenario.

2) Personal growth through insight into human behaviour :-

As per Robert P. Vecchio people study organisational behaviour to attain self accomplishment that one gets while learning about the behaviour and attitude of others. This ultimately results in improved self knowledge and self insight. For example when people study the factors which drive other people they also come to know the factors which encourage themselves.

3) Improvement of organisational and individual effectiveness :-

The study of organisational behaviour provides information that can be used to solve organisational issues. It also improves organisational effectiveness i.e. the potential of an organisation to be efficient and to meet the requirements of the parties involved.

According to Human and Freeman "organisational effectiveness is the degree of congruence between organisational goals and observable outcomes."

4) Sharpening and Refining of common sense :-

Gaining knowledge and information about organisational behaviour is crucial for a manager as it teaches them how to deal with their subordinates which cannot be thought through any book. Common sense without the knowledge of organisational behaviour is not enough to manage workforce. Knowledge of OR sharpness & widens the sphere of common sense.

Importance of organisation behaviour;
Importance of studying organisational behaviour is as follows

1) Helps in Understanding Human behaviour:-

Human being interact differently and this interaction can be understood with the help of organisational behaviour. Hence organisational behaviour is studied at various levels as per the organisational need i.e. individuals level, interpersonal level, group level and organisational level.

2) Assists in controlling and Directing behaviour:-

once the manager has understood human behaviour his focus should be on controlling and directing the behaviour at all level of interaction, thereby helping the organisation in achieving its goals.

3) Explain Application of power and sanction:-

Managers can use power and sanction to control and direct the behaviour of their employees. organisational behaviour teaches how to use power and sanction in order to attain the goals of both the employee and the organisation at the same time.

4) Helps in Understanding leadership concepts:-

organisational behaviour helps the managers to view the theory of leadership

in a new perspective, it identifies multiple leadership styles and helps the managers in the choosing the most appropriate style of leadership in that condition.

5) Evaluates communication process :-

Effective communication is a giant steps towards achieving organisational goals. Half the task is done if employees learn to communicate effectively. Organisational behaviour evaluates communication process and its role in interpersonal dynamics.

Q-1
 Ans Management:-
 Management is stand to act planning, organizing, directing, controlling this required for manager to all employees. Management is the human being and physical worked in the management.
 Management is all types types places are required in companies, hotels and shops. Management are core of the business in ~~busi~~ Corporated world. It's important for management.

PRELIMINARY EXAMINATION

Semester- I

Academic Year – 2019-20

Subject: GE -111 Legal Aspects of Business I

Marks: 50

Duration: 2.15 Hours

Instructions to the candidates:

1. All questions are compulsory.
2. Draw diagrams wherever necessary.
3. Figures to the right of each question indicate the marks.

Q1. Answer any five questions from the questions given below :- (5*2=10marks)

1. Define contract of guarantee.
2. Define breach of contract.
3. Define a contract of sale.
4. Define a cheque.
5. Define company.
6. Define Article of Association (AOA).
7. What do you mean by consumer dispute?
8. Define digital signature.

Q2. Answer any two questions from the questions given below: - (2*5=10marks)

1. What is the concept of contract? Write the essential elements of valid contract as in the Indian Contract Act, 1872.
2. Who is unpaid seller? Explain the rights of an unpaid seller.
3. What is dishonour of 'Negotiable Instrument'? What is noting and protesting.

Q3. Answer any one question from the questions given below: - (1*10=10marks)

1. Explain the concept of Negotiable Instrument. What are the various types of Negotiable instrument?

2. What is crossing of a cheque? Explain in detail the various types of crossing.

Q4. Answer any one question from the questions given below: - (1*10=10marks)

1. Distinguish between Private Company and Public Company.

(OR)

2. What is the meaning and contents of Memorandum of Association (MOA).

Q5. Answer any one question from the questions given below: - (1*10=10marks)

1. Define 'consumer' according to the Consumer Protection Act, 1986. Explain consumer dispute redressal agencies.

(OR)

2. What is intellectual property? Explain in detail its different types.

PRELIMINARY EXAMINATION

Semester- I

Academic Year – 2019-20

Subject: GC -102 Organizational Behaviour

Marks: 50

Duration: 2.30 Hours

Instructions to the candidates:

1. All questions are compulsory.
2. Draw diagrams wherever necessary.
3. Figures to the right of each question indicate the marks.

Q1. Answer any five questions from the questions given below :- (5*2=10marks)

1. Define organizational behaviour.
2. Define value.
3. What is personality and attitude?
4. Define perception.
5. Define group dynamics.
6. What do you mean by conflict management?
7. What do you understand by work stress?
8. Define organizational change.

Q2. Answer any two questions from the questions given below: - (2*5=10marks)

1. Explain any four models of 'Organizational Behaviour with suitable examples.
2. Critically examine the Maslow's need Hierarchy theory of motivation.
3. What is organizational culture? Explain the influential factors which contribute in creating positive organizational culture.

Q3. Answer any one question from the questions given below: - (1*10=10marks)

1. Explain the concept of leadership with the contemporary theories of leadership.

(OR)

Explain the concept of the Five -Stage Model of Group Development in detail.

Q4. Answer any one question from the questions given below: - (1*10=10marks)

1. Explain in detail the sources and types of conflicts.

(OR)

2. Define 'Organisational culture' Explain various methods adopted for creating positive organisational culture.

Q5. Answer any one question from the questions given below: - (1*10=10marks)

1. What are the causes of stress? Define the individual level and organizational level stress management strategies.

(OR)

2. Discuss the intervention strategies for facilitating organisational change.

Unit 1 : Interference

* Interference in thin film of uniform thickness

1) Volume = Area \times thickness

2) $2\mu t \cos r = n\lambda$

3) $d = \frac{\lambda}{2\beta}$

4) $\lambda = \frac{D_{ntm}^2 - D_n^2}{4mR}$

5) $\mu = \frac{D_{air}^2}{D_{liquid}^2}$

6) $R = \frac{D_{ntm}^2 - D_n^2}{4m\lambda}$

7) $\beta = \frac{\lambda}{2\mu\theta}$

For air medium, $\mu = 1$

$\therefore \beta = \frac{\lambda}{2\theta}$

8) Antireflection coating

$$t = \frac{\lambda}{4\mu}$$

9) $\lambda = \frac{D_{ntm}^2 - D_n^2}{4mR}$

10) $\mu = \frac{D_{air}^2}{D_{liquid}^2}$

11) $R = \frac{D_{ntm}^2 - D_n^2}{4m\lambda}$

Diffraction

1) The condition for min. intensity in single slit,

$$a = \frac{n\lambda}{\sin\theta}$$

2) The angle of diffraction is given by

$$\theta = \sin^{-1}\left(\frac{n\lambda}{a}\right)$$

3) $n_{max} = \frac{a+b}{\lambda}$

Unit II

Sound & Ultrasonics

1) Sabine's Formula is given by,

$$T = \frac{KV}{A}$$

where, V = Volume of Hall

$A = \sum aS$ i.e., Total sound energy absorbed by the various sound absorbing materials,

K = Proportionality const.

If V is in cubic meters & S is in square meters, $K = 0.165$

If V is in cubic feet & S is in square feet,

$$K = 0.005$$

The absorption in hall is given by,

$$A = \frac{0.165V}{T}$$

The reverberation time is given by,

$$T = \frac{0.165V}{\sum aS}$$

The fundamental freq. of vibration of piezoelectric oscillator,

$$f = \frac{1}{2t} \sqrt{\frac{Y}{\rho}}$$

The fundamental freq of vibration Magnetostriction oscillator,

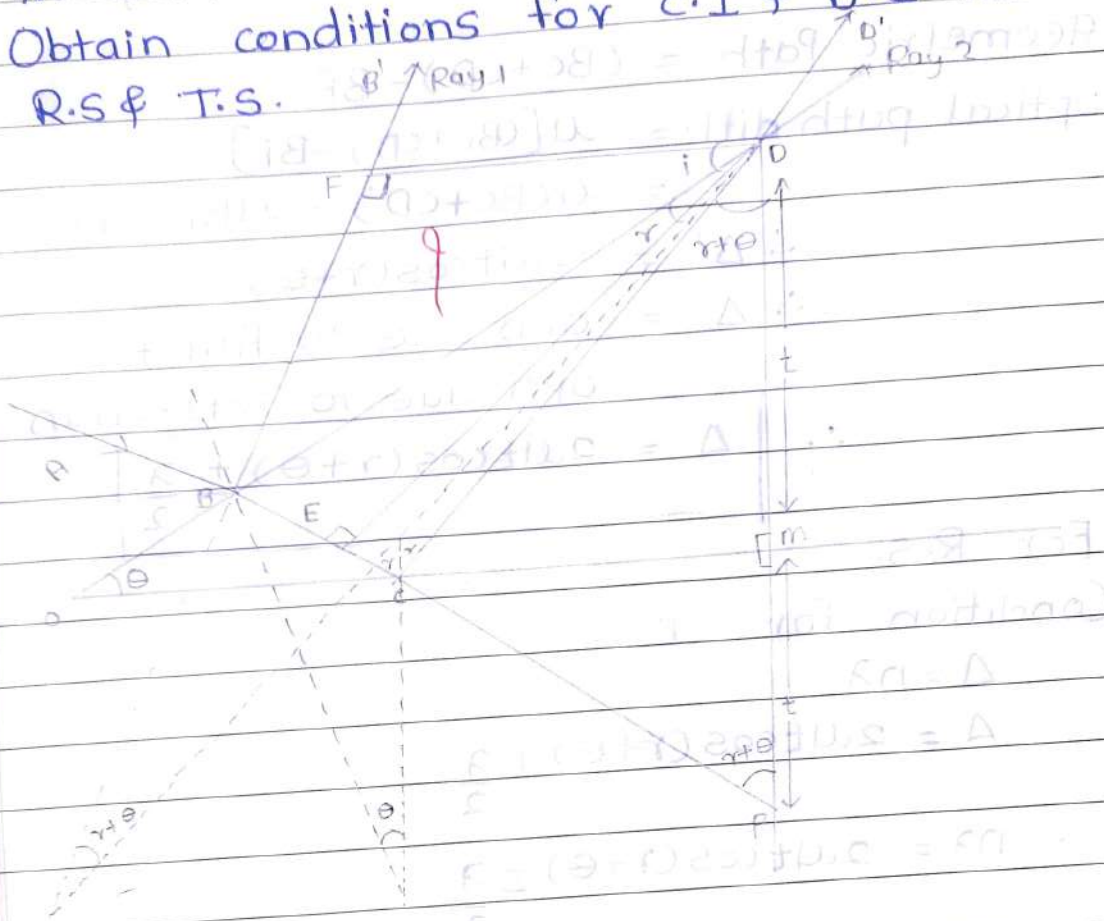

$$f = \frac{1}{2L} \sqrt{\frac{Y}{\rho}}$$

06
06 *Final*

Assignment No :- 02

DATE / /

Q.1. Give the analytical treatment of interference in thin film of non-uniform thickness. Obtain conditions for C.I & D.I in both R.S & T.S.

A wedge is a film or plate of varying thickness having zero thickness at one end & progressively increasing to particular value at other end.

Consider, a thin film of non-uniform thickness bounded betⁿ two planes \uparrow ox & oy which are inclined to each other at an angle ' θ '. The thickness of the film is zero at the point of contact & progressively increasing outwards.

In order to obtain condition

for this interference we have to obtain total optical path diff. betⁿ 'Ray 1' & 'Ray 2'

$$\text{geometric Path} = (BC + CD) - BF$$

$$\begin{aligned}\text{optical path diff.} &= \mu[(BC + CD) - BF] \\ &= \mu(BC + CD) - \mu BF \quad \text{--- (i)}\end{aligned}$$

$$\therefore \Delta' = 2\mu t \cos(r + \theta)$$

$$\therefore \Delta = \text{OPD due to film} + \text{OPD due to reflection}$$

$$\therefore \boxed{\Delta = 2\mu t \cos(r + \theta) + \frac{\lambda}{2}}$$

For R.S.

i) Condition for C.I.:

$$\Delta = n\lambda$$

$$\Delta = 2\mu t \cos(r + \theta) + \frac{\lambda}{2}$$

$$\therefore n\lambda = 2\mu t \cos(r + \theta) + \frac{\lambda}{2}$$

$$\therefore \boxed{2\mu t \cos(r + \theta) = (2n - 1) \frac{\lambda}{2}}$$

ii) Condition for D.I.:

$$\Delta = (2n + 1) \frac{\lambda}{2}$$

$$\Delta = 2\mu t \cos(r + \theta) + \frac{\lambda}{2}$$

$$\therefore 2\mu t \cos(r + \theta) + \frac{\lambda}{2} = (2n + 1) \frac{\lambda}{2}$$

$$\therefore \boxed{2\mu t \cos(r + \theta) = n\lambda}$$

For T.S

i) Condition for C.I.:

$$\Delta = n\lambda$$

$$\Delta = 2\mu t \cos(r+\theta)$$

$$\therefore 2\mu t \cos(r+\theta) = n\lambda$$

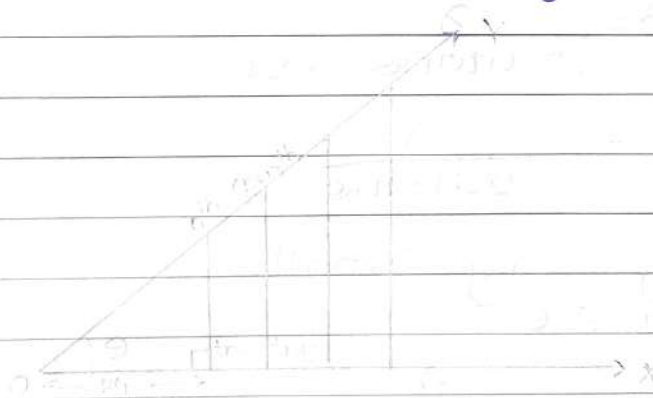

ii) Condition for D.I.:

$$\Delta = \frac{(2n+1)\lambda}{2}$$

$$\Delta = 2\mu t \cos(r+\theta)$$

$$\therefore 2\mu t \cos(r+\theta) = \frac{(2n+1)\lambda}{2}$$

Q.2. What is Fringe Width? Prove that, the fringe width for non-uniform thin film is inversely proportional to wedge angle.

$$2\mu t \cos(r+\theta) = \frac{(2n+1)\lambda}{2}$$

$$2\mu t_n \cos(r+\theta) = \frac{(2n+1)\lambda}{2} \quad \text{--- (i)}$$

From geometry of fig,

$$\tan \theta = \frac{t_n}{x_n}$$

$$\therefore t_n = x_n \cdot \tan \theta \quad \text{--- (ii)}$$

For T.S

i) Condition for C.I.:

$$\Delta = n\lambda$$

$$\Delta = 2\mu t \cos(r+\theta)$$

$$\therefore 2\mu t \cos(r+\theta) = n\lambda$$

ii) Condition for D.I.:

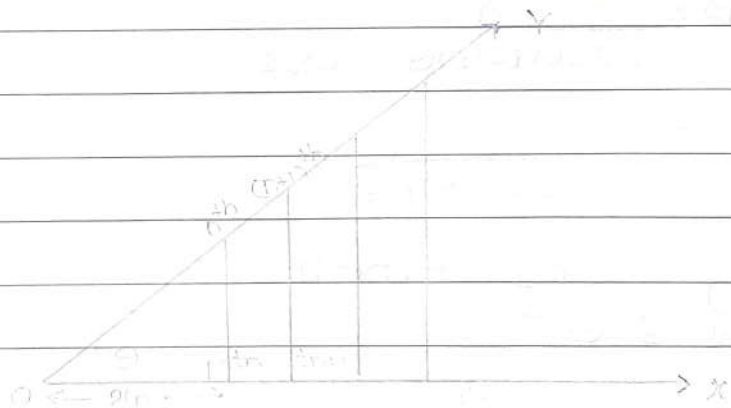

$$\Delta = \frac{(2n\pm 1)\lambda}{2}$$

$$\Delta = 2\mu t \cos(r+\theta)$$

$$\therefore 2\mu t \cos(r+\theta) = \frac{(2n\pm 1)\lambda}{2}$$

$\frac{03}{04}$

Q.2. What is Fringe Width? Prove that, the fringe width for non-uniform thin film is inversely proportional to wedge angle.

$$2\mu t \cos(r+\theta) = \frac{(2n\pm 1)\lambda}{2}$$

$$2\mu t_n \cos(r+\theta) = \frac{(2n\pm 1)\lambda}{2} \quad \text{--- (i)}$$

From geometry of fig,

$$\tan \theta = \frac{t_n}{x_n}$$

$$\therefore t_n = x_n \cdot \tan \theta \quad \text{--- (ii)}$$

Use eq (iii) in eq (ii)

$$\therefore 2\mu x_n \tan \theta \cos(r+\theta) = \frac{(2n+1)\lambda}{2} \quad \text{--- (iii)}$$

$$2\mu x_{n+1} \tan \theta \cos(r+\theta) = \frac{[2(n+1)+1]\lambda}{2}$$

$$2\mu x_{n+1} \tan \theta \cos(r+\theta) = \frac{(2n+2+1)\lambda}{2} \quad \text{--- (iv)}$$

Subtracting (iii) from (iv)

$$2\mu \tan \theta \cos(r+\theta) [x_{n+1} - x_n] = \lambda$$

$$\therefore 2\mu \tan \theta \cos(r+\theta) \cdot \beta = \lambda$$

where, $\beta = x_{n+1} - x_n$

$$\therefore \beta = \frac{\lambda}{2\mu \tan \theta \cos(r+\theta)}$$

For normal incidence,

$$\angle i = \angle r = 0$$

$$\therefore \beta = \frac{\lambda}{2\mu \tan \theta \cdot \cos \theta}$$

$$\therefore \beta = \frac{\lambda}{2\mu \sin \theta}$$

θ being very small,
 $\sin \theta \approx \theta$

$$\therefore \beta = \frac{\lambda}{2\mu \theta}$$

For air medium, $\mu = 1$

$$\therefore \beta = \frac{\lambda}{2\theta}$$

$$\therefore \beta \propto \frac{1}{\theta} \quad (\because \lambda \text{ \& } 2 \text{ are constants})$$

Hence, Fringe width is inversely proportional to wedge angle.
Hence, Proof.

1 Define the File and diff. type of path for the File with example.

Ans -

File is named location on the disk to store information.

- File is basically used to store the information permanently on secondary memory,

- Due to this, even if the computer is switched off, the data remain permanently on sec. memory, hence is called persistent data structure.

- Every File is located by its path. This path at the root folder. In window C:\ D:\ or E:\ etc.

- The character \ used in the pathname is called delimiter.

2 Differentiate between text and binary file.

Text File	Binary File
1 Data is present in the form of character	Data is present in the form of encoded

<p>2. The plain text is present in the File</p>	<p>The image, audio or text data can be present in the file.</p>
<p>3. It cannot be corrupted</p>	<p>It cannot read using if single bit is changed then the file gets corrupted.</p>
<p>4. It can be opened and read simple text editor like Notepad.</p>	<p>It cannot read using text editor like Notepad.</p>

3 Explain use of different File attributes in python program

→ File object attributes -

An opening the file successful the File object is returned it is possible to get diff. types of the

Information related to the File. using the object and attributes associated with File object. This attribute is

1- File object Name -

It returns the name of File

2- File object mode -

It returns mode of the File with which File open

3- File object close -

It returns true if File is close otherwise false -

```
e.g; - f1 = open("text.txt", 'rt')
print("File name = ", f1.name)
if (f1.closed == True)
    print("File is closed")
else
```

```
    print("File is open")
print("File mode = ", f1.mode)
```

Q-4) - Write different type of File operation with suitable example in Python :-

- Reading a File -

For Reading a File

We must open the file in 'e' and we must specify the correct file name which is to be read.

The read() method is used for reading the file. We can close the file using file close() and again reopen it.

e.g- `F1 = open("text", 'e+')
F1.read()`

o/p >>> Introduction to python program, it is easy to learn.

Reading a File -

For reading a file, we must open the file in 'e' and we must specify the correct filename which is to be read. The read() method is used for reading the file. We can close the file using the close() command.

e.g- `F1 = open("text.txt", 'e+')
F1.read()`

o/p - Introduction to python program
it is oop language
it is easy to learn.

Writing the File -

For writing the content of a file we must open the file in writing mode. For this we use 'w' or 'x' mode, in the subsequent write command we use \n so that contents are written on the next line of file.

Syntax → File - object . write (content)

eg- `F1 = open ("C:\my programs\prog1.py"`

`F1.write ("Introduction to python program in "`

`F1.close ()`

5- Explain different functions used with respect to file position

1- Seek method:-

→ the seek () method is used to change the file position. The method seek () sets the file

current position at the offset.

Syntax \rightarrow File-object.seek.

When offset is position of lead or pointer within the file and hence is the optional and default to which means seek relative to the current position and two means seek relative to end.

2] Tell() method:-

The tell method returns the current file position of the file lead or write pointer within the file.

e.g:- File-object.tell()

```
F1 = open ("C:\my programs  
sample 1.py")
```

```
print (F1.tell ())
```

```
print (F1.tell ())
```

```
F1.seek (0) # move file cursor  
to initial position.
```

```
print ("The current position is")  
print (F1.tell ())
```

```
# get concurrent  
position of file
```

09/10

Job

28-06-2021

Assignment No. 1

Q1) Explain the structure of C++ program with an example.

Ans1) Structure of C++ program:

Header file declaration section
Global declaration section
Class declaration & method Definition section
Main function
Method function

In the above given structure we can see various section,

- 1st section is header file declaration section it consists of all the required header files
- 2nd is global declaration section, it consists of global variables.
- 3rd section is class declaration & method definition section, classes are declared here & functions / methods are declared inside the class only.

-) Fourth section is a main function, it is nothing but the starting point of the program.
-) Fifth section is method definition section if we don't declare method/function inside class then after the main function all the function are defined.

```
#include <iostream>
using namespace std;
```

```
struct person
```

```
{
```

```
    char name[50];
```

```
    int age;
```

```
    float salary;
```

```
};
```

```
int main()
```

```
{
```

```
    person p1;
```

```
    cout << "Enter full name: ";
```

```
    cin.get(p1.name, 50);
```

```
    cout << "Enter age: ";
```

```
    cin >> p1.age;
```

```
    cout << "Enter salary: ";
```

```
    cin >> p1.salary;
```

```
cout << "\n Displaying Information"
cout << " Name: " << P, name << endl
cout << " Age: " << P, age << endl
cout << " salary: " << P, salary;
```

```
return 0;
```

```
}
```

Q2) Write a short note on selection statement or looping statement.

- Ans) Selection statement —
- 1) If statement is used as control statement.
 - 2) It alters the flow of program execution.
 - 3) It can be implemented as simple if statement or if - - - - else statement.
 - 4) With simple if statement, if condition satisfy then that block of code will be executed.
 - 5) With if - - - - else statement, if condition satisfies then block of statement will be executed or else it will be blocked.

•) if-else example:

```
#include <iostream>
using namespace std;
int main()
{
    int a = 10;
    if (a == 10)
    {
        cout << "\n Given number is 10";
    }
    else
    {
        cout << "\n Given number is not 10";
    }
}
```

```
return 0;
```

```
}
```

Output : Given number is 10.

-) Looping Statement - 1) It is used to repeat the block of statement.
- 2) Condition is mentioned which decides how many times the block of statement should be executed.
- 3) Looping is possible with -
 - a) for
 - b) while
 - c) Do.....while

-) For Loop - 1) It is used to execute certain block of statement for many times.
-) In for loop we can mention loop initialization condition checking and increment/decrement operation.
-) In body of for loop we can write statement which should be executed properly

Syntax :

```
for (initialization; condition; increment/  
decrement)
```

```
{  
  // statements;
```

```
}
```

```
#include <iostream>
```

```
using namespace std;
```

```
int main (-)
```

```
{  
  int i;
```

```
  for (i=0, i<5, i++)
```

```
  {  
    cout << "i loop is executing for "<< i << "  
    times;"
```

```
  }  
  return 0;
```

```
}
```

Output :

Loop is executing for 0 time
Loop is executing for 1 time
Loop is executing for 2 time
Loop is executing for 3 time
Loop is executing for 4 time

-) While Loop - It is simple form of for loop. For loop and while loop does the same thing. Only difference betⁿ for & while loop is in syntax. While loop is also used for executing the same block of code for many times.

Syntax :

Initialization;
while (condition)

{
 // statements;
 // increment / decrement;

}

#include <iostream>

using namespace std;

int main ()

{

```
int i;  
i = 0;  
while (i < 5)  
{  
    cout << " | n loop is executing for  
    " << i << " time";  
  
    i++;  
}  
return 0;
```

Output — loop is executing 0 time
loop is executing 1 time
loop is executing 2 time
loop is executing 3 time
loop is executing 4 time

•) Do-while loop — 1) Do while is also same like while statement. The difference between do and while is that in while statement condition is checked before loop execution whereas in do-while condition is checked after loop execution. simply while loop checks condition first whereas do-while checks condition afterwards.

Syntax:

```
Initialization;  
do  
{  
  // statements;  
  // increment / decrement;  
}  
while (condition);
```

```
#include <iostream>  
using namespace std;  
int main ()  
{  
  int i;  
  i = 0;  
  do  
  {  
    cout << "\n loop is executing for " << i << "  
    time";  
    i++;  
  } while (i < 5);  
  return 0;  
}
```

Output - loop is executing 0 time
loop is executing 1 time
loop is executing 2 time
loop is executing 3 time
loop is executing 4 time

Q 3) Write a short note on constructor & its types.

Ans 3) Constructor is used to initialize the objects. It is special function which is automatically called during object creation.

* Types of Constructor -

- 1) Parameterized Constructor - is used to pass the argument to constructor during object creation.
- Passing values can be used for initialization purpose.
- Multiple constructor within class.
- It means that a class can have combination of the default, parameterized etc.
- Constructor with default parameters
- All the rules for the default constructor will be applicable.

2) Copy Constructor - It is used to initialize one object from another object of same type.

• It can be used to copy constructor as to copy an object to pass it as argument to function.

• Copy an object to return it from function

- Default Copy Constructor -

• C++ create default constructor if we don't define it.

• Constructor created by compiler has an empty body. It does not assign default values to data members.

• Compiler also creates a copy constructor if we don't write our own copy constructor.

Q4) Explain Array with an example.

Ans 4) Array is single or multi dimensional Array can be created as follows:

```
int a[10];
```

```
float f[20];
```

```
char c[30];
```

Above statement creates an single dimensional array.

→ Array a is created of size 10 it means we can store 10 different integer number.
Array f will be created of size 20 it means that we can store 20 different floating points members. Array c will be created of size 30 it means we can store 30 different characters.

•) An array can be initialized at the time of creation also

```
int a[5] = { 10, 20, 30, 40, 50 },  
           0  1  2  3  4  
           |10|20|30|40|50|
```

•) 10 will be stored on 0th position 20 on 1st position and so on.

•) Index position of array always start with 0 means index will be 0 to 9 for array with 10 size.

```
#include <iostream>  
using namespace std;  
int main()  
{  
    int a[10],  
    char c[20];
```

a[0] = 100; // store value in an array at 0
a[1] = 200; // store value in an array at 1
position

cout << "n element position 0 is " << a[0];
cout << "n element position 1 is " << a[1];

c[0] = 'a';
c[1] = 'b';

cout << "n element position 0 is " << c[0];
cout << "n element position 1 is " << c[1];

return 0;
}

Output - element position 0 is 100
 element position 1 is 200
 element position 0 is a
 element position 1 is b

Q 5) Explain class, object, data member, member function with an example.

- Ans 5) • Class -
- 1) Class is user defined data type.
 - 2) It is used to create new data type
 - 3) Objects are created whose data type is class.
 - 4) It is one of the imp feature of C++
 - 5) class creation consists of two parts.

Class declaration & class function defn

- Class declaration defines types and scope of class members. Behaviour of class is defined by functions.
- Class declaration is similar to structure declaration.
- It starts with class keyword.
- Body of class is enclosed in { } and terminated.
- Generally class name should be meaningful.
- After class declaration, class name becomes new data type.

-) Object — •) Class declaration just creates the template.
-) Until we instantiate class, it is of no use.
-) After class declaration we can create variables of its type.
-) Class variable is known as objects.

* Example of class and object is given below:

```
#include <iostream>  
using namespace std;
```

```
class amount {
```

```
private:
```

```
int account_number;
```

```
float balance;
```

```
public:
```

```
void set_value() {
```

```
account_number = 10;
```

```
balance = 100;
```

```
}  
void display() {
```

```
cout << "Account number : " << account_number;
```

```
cout << "\n Balance : " << balance;
```

```
}  
  
};  
int main()  
{  
    Account A;  
  
    A.set_value();  
    A.display();  
    return 0;  
}
```

Output - Account number : 10,
Balance : 100

-) Data Member - Data member and member function of class belongs to class scope.
-) In object oriented programming language we use the word access rather than scope.
-) Public member of class are accessible from anywhere in the program.
-) Private member of a class is accessed only through methods of class in which they have defined.

- Protected member of class is accessible to their own class and subclass of that class.
- Member function: They are operators and functions that are declared as members of a class. Member function do not includes operator and functions declared with the friend specifier. These are called as friends of a class. You can declare a member function as static; this is called as static member function.

* There are 5 types of member function —

- 1) Simple functions
- 2) Inline functions
- 3) Friend functions
- 4) Const functions
- 5) Static functions,

Unit 1 : Interference

* Interference in thin film of uniform thickness

1) Volume = Area \times thickness

2) $2\mu t \cos r = n\lambda$

3) $d = \frac{\lambda}{2\beta}$

4) $\lambda = \frac{D_n^2 m - D_n^2}{4mR}$

5) $\mu = \frac{D_{air}^2}{D_{liquid}^2}$

6) $R = \frac{D_n^2 m - D_n^2}{4m\lambda}$

7) $\beta = \frac{\lambda}{2\mu\theta}$

For air medium, $\mu = 1$

$\therefore \beta = \frac{\lambda}{2\theta}$

8) Antireflection coating

$t = \frac{\lambda}{4\mu}$

9) $\lambda = \frac{D_n^2 m - D_n^2}{4mR}$

10) $\mu = \frac{D_{air}^2}{D_{liquid}^2}$

11) $R = \frac{D_n^2 m - D_n^2}{4m\lambda}$

Diffraction

1) The condition for min. intensity in single slit,

$a = \frac{n\lambda}{\sin\theta}$

2) The angle of diffraction is given by

$\theta = \sin^{-1}\left(\frac{n\lambda}{a}\right)$

3) $n_{max} = \frac{a+b}{\lambda}$

Unit II

Sound & Ultrasonics

1) Sabine's Formula is given by,

$$T = \frac{KV}{A}$$

where, V = Volume of Hall

$A = \sum aS$ i.e., Total sound energy absorbed by the various sound absorbing materials,

K = Proportionality const.

If V is in cubic meters & S is in square meters, $K = 0.165$

If V is in cubic feet & S is in square feet,

$$K = 0.005$$

The absorption in hall is given by,

$$A = \frac{0.165V}{T}$$

The reverberation time is given by,

$$T = \frac{0.165V}{\sum aS}$$

The fundamental freq. of vibration of piezoelectric oscillator,

$$f = \frac{1}{2t} \sqrt{\frac{Y}{\rho}}$$

The fundamental freq of vibration Magnetostriction oscillator,

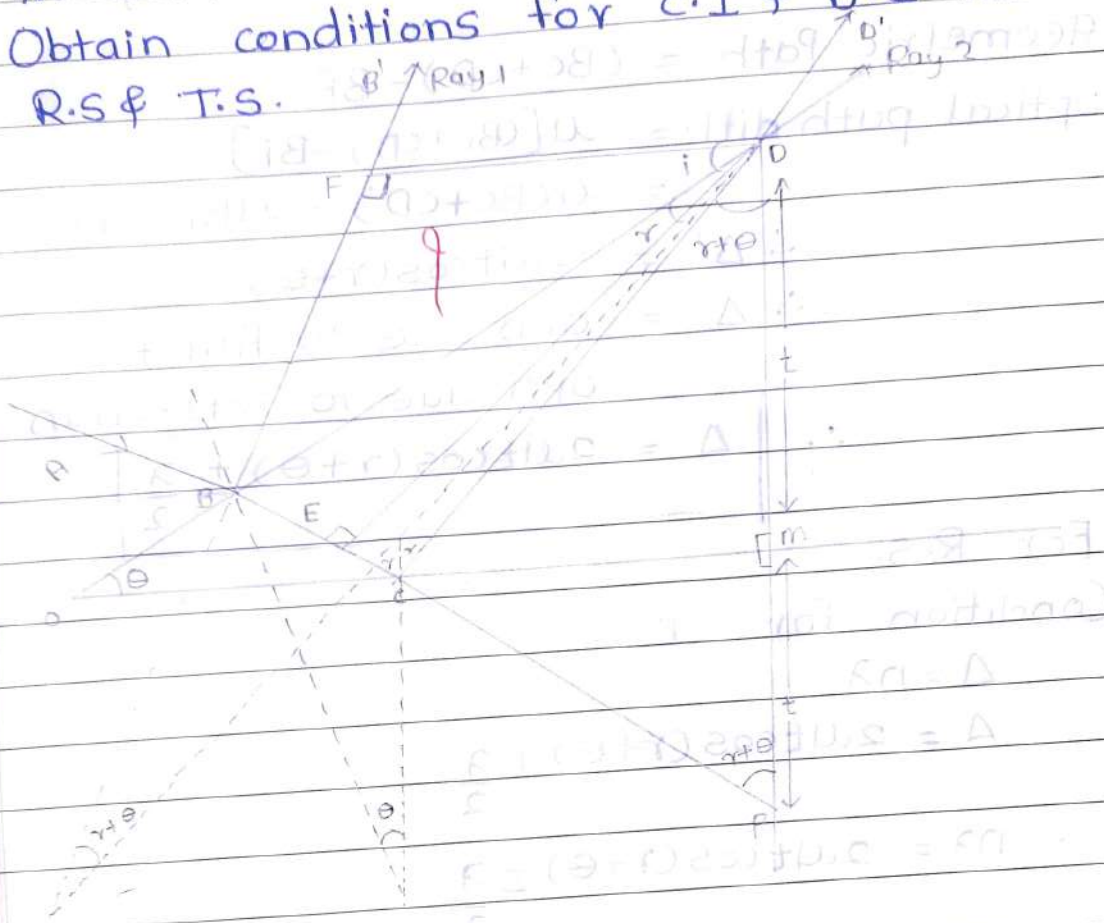

$$f = \frac{1}{2L} \sqrt{\frac{Y}{\rho}}$$

Assignment No :- 02

DATE / /

Q.1. Give the analytical treatment of interference in thin film of non-uniform thickness. Obtain conditions for C.I & D.I in both R.S & T.S.

A wedge is a film or plate of varying thickness having zero thickness at one end & progressively increasing to particular value at other end.

Consider, a thin film of non-uniform thickness bounded betⁿ two planes \uparrow ox & oy which are inclined to each other at an angle ' θ '. The thickness of the film is zero at the point of contact & progressively increasing outwards. In order to obtain condition

for this interference we have to obtain total optical path diff. betⁿ 'Ray 1' & 'Ray 2'

$$\text{geometric Path} = (BC + CD) - BF$$

$$\begin{aligned}\text{optical path diff.} &= \mu[(BC + CD) - BF] \\ &= \mu(BC + CD) - \mu BF \quad \text{--- (i)}\end{aligned}$$

$$\therefore \Delta' = 2\mu t \cos(r + \theta)$$

$$\therefore \Delta = \text{OPD due to film} + \text{OPD due to reflection}$$

$$\therefore \boxed{\Delta = 2\mu t \cos(r + \theta) + \frac{\lambda}{2}}$$

For R.S.

i) Condition for C.I.:

$$\Delta = n\lambda$$

$$\Delta = 2\mu t \cos(r + \theta) + \frac{\lambda}{2}$$

$$\therefore n\lambda = 2\mu t \cos(r + \theta) + \frac{\lambda}{2}$$

$$\therefore \boxed{2\mu t \cos(r + \theta) = (2n - 1) \frac{\lambda}{2}}$$

ii) Condition for D.I.:

$$\Delta = (2n + 1) \frac{\lambda}{2}$$

$$\Delta = 2\mu t \cos(r + \theta) + \frac{\lambda}{2}$$

$$\therefore 2\mu t \cos(r + \theta) + \frac{\lambda}{2} = (2n + 1) \frac{\lambda}{2}$$

$$\therefore \boxed{2\mu t \cos(r + \theta) = n\lambda}$$

For T.S

i) Condition for C.I.:

$$\Delta = n\lambda$$

$$\Delta = 2\mu t \cos(r+\theta)$$

$$\therefore 2\mu t \cos(r+\theta) = n\lambda$$

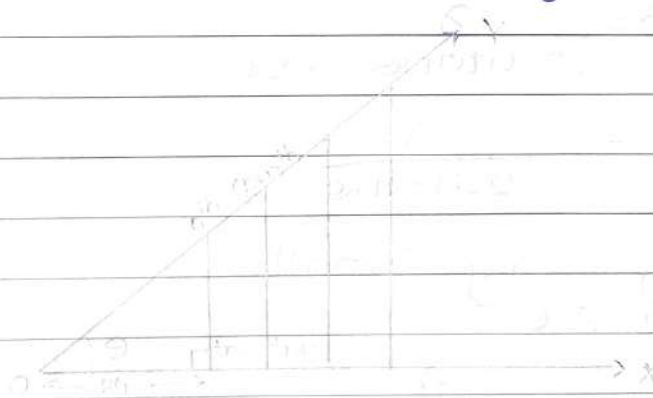

ii) Condition for D.I.:

$$\Delta = \frac{(2n \pm 1)\lambda}{2}$$

$$\Delta = 2\mu t \cos(r+\theta)$$

$$\therefore 2\mu t \cos(r+\theta) = \frac{(2n \pm 1)\lambda}{2}$$

Q.2. What is Fringe Width? Prove that, the fringe width for non-uniform thin film is inversely proportional to wedge angle.

$$2\mu t \cos(r+\theta) = \frac{(2n \pm 1)\lambda}{2}$$

$$2\mu t_n \cos(r+\theta) = \frac{(2n \pm 1)\lambda}{2} \quad \text{--- (i)}$$

From geometry of fig,

$$\tan \theta = \frac{t_n}{x_n}$$

$$\therefore t_n = x_n \cdot \tan \theta \quad \text{--- (ii)}$$

For T.S

i) Condition for C.I.:

$$\Delta = n\lambda$$

$$\Delta = 2\mu t \cos(r+\theta)$$

$$\therefore 2\mu t \cos(r+\theta) = n\lambda$$

ii) Condition for D.I.:

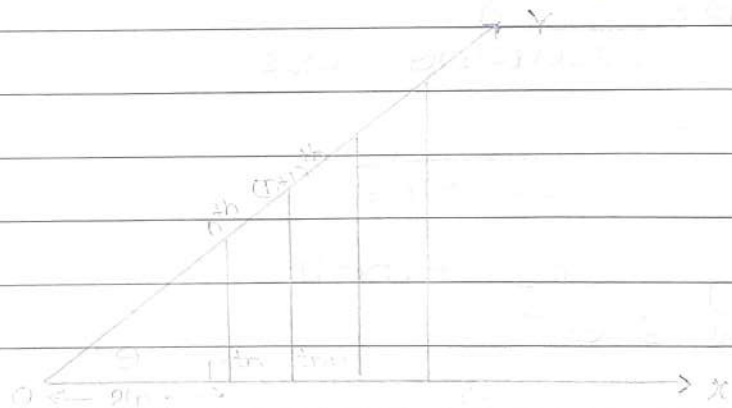

$$\Delta = \frac{(2n \pm 1)\lambda}{2}$$

$$\Delta = 2\mu t \cos(r+\theta)$$

$$\therefore 2\mu t \cos(r+\theta) = \frac{(2n \pm 1)\lambda}{2}$$

$\frac{03}{04}$

Q.2. What is Fringe Width? Prove that, the fringe width for non-uniform thin film is inversely proportional to wedge angle.

$$2\mu t \cos(r+\theta) = \frac{(2n \pm 1)\lambda}{2}$$

$$2\mu t_n \cos(r+\theta) = \frac{(2n \pm 1)\lambda}{2} \quad \text{--- (i)}$$

From geometry of fig,

$$\tan \theta = \frac{t_n}{x_n}$$

$$\therefore t_n = x_n \cdot \tan \theta \quad \text{--- (ii)}$$

Use eq (iii) in eq (i)

$$\therefore 2\mu x_n \tan \theta \cos(r+\theta) = \frac{(2n+1)\lambda}{2} \quad \text{--- (iii)}$$

$$2\mu x_{n+1} \tan \theta \cos(r+\theta) = \frac{[2(n+1)+1]\lambda}{2}$$

$$2\mu x_{n+1} \tan \theta \cos(r+\theta) = \frac{(2n+2+1)\lambda}{2} \quad \text{--- (iv)}$$

Subtracting (iii) from (iv)

$$2\mu \tan \theta \cos(r+\theta) [x_{n+1} - x_n] = \lambda$$

$$\therefore 2\mu \tan \theta \cos(r+\theta) \cdot \beta = \lambda$$

where, $\beta = x_{n+1} - x_n$

$$\therefore \beta = \frac{\lambda}{2\mu \tan \theta \cos(r+\theta)}$$

For normal incidence,

$$\angle i = \angle r = 0$$

$$\therefore \beta = \frac{\lambda}{2\mu \tan \theta \cdot \cos \theta}$$

$$\therefore \beta = \frac{\lambda}{2\mu \sin \theta}$$

θ being very small,
 $\sin \theta \approx \theta$

$$\therefore \beta = \frac{\lambda}{2\mu \theta}$$

For air medium, $\mu = 1$

$$\therefore \beta = \frac{\lambda}{2\theta}$$

$$\therefore \beta \propto \frac{1}{\theta} \quad (\because \lambda \text{ \& } 2 \text{ are constants})$$

Hence, Fringe width is inversely proportional to wedge angle.
Hence, Proof.

1 Define the File and diff. type of path for the File with example.

Ans -

File is named location on the disk to store information.

- File is basically used to store the information permanently on secondary memory,

- Due to this, even if the computer is switched off, the data remain permanently on sec. memory, hence is called persistent data structure

- every File is located by its path. this path at the root folder. In window C:\ D:\ or E:\ etc.

- The character \ used in the pathname is called delimiter.

2 Differentiate between text and binary file.

Text File	Binary File
1 Data is present in the form of character	Data is present in the form of encoded

2. The plain text is present in the File

The image, audio or text data can be present in the file.

3. It cannot be corrupted

It cannot read using if single bit is changed then the file gets corrupted.

4. It can be opened and read simple text editor like Notepad.

It cannot read using text editor like Notepad.

3 Explain use of different file attributes in python program

→ File object attributes -

An opening the file successful the file object is returned it is possible to get diff. types of the

Information related to the File. using the object and attributes associated with File object. This attribute is

1- File object Name -

It returns the name of File

2- File object mode -

It returns mode of the File with which File open

3- File object close -

It returns true if File is close otherwise false -

```
e.g; - f1 = open("text.txt", 'rt')
print("File name = ", f1.name)
if (f1.closed == True)
    print("File is closed")
else
```

```
    print("File is open")
print("File mode = ", f1.mode)
```

Q-4) - Write different type of File operation with suitable example in Python :-

- Reading a File -

For reading a File

We must open the file in 'e' and we must specify the correct file name which is to be read.

The read() method is used for reading the file. We can close the file using file close() and again reopen it.

e.g- `F1 = open("text", 'e+')
F1.read()`

o/p >>> Introduction to python program, it is easy to learn.

Reading a File -

For reading a file, we must open the file in 'e' and we must specify the correct filename which is to be read. The read() method is used for reading the file. We can close the file using the close() command.

e.g- `F1 = open("text.txt", 'e+')
F1.read()`

o/p - Introduction to python program
it is oop language
it is easy to learn.

Writing the File -

For writing the content of a file we must open the file in writing mode. For this we use 'w' or 'x' mode, in the subsequent write command we use \n so that contents are written on the next line of file,

Syntax → File - object . write,
content

eg- `F1 = open('c:\my programs\prog
1.py`

`F1.write("Introduction to
python program in")`

`F1.close()`

5- Explain different functions used with respect to file position

1- Seek method:-

→ the seek() method is used to change the file position
→ the method seek() sets the file

current position at the offset.

Syntax \rightarrow File-object.seek.

When offset is position of lead or pointer within the file and hence is the optional and default to which means seek relative to the current position and two means seek relative to end.

2] Tell() method:-

The tell method returns the current file position of the file lead or write pointer within the file.

e.g:- File-object.tell()

```
F1 = open ("C:\my programs  
sample 1.py")
```

```
print (F1.tell ())
```

```
print (F1.tell ())
```

```
F1.seek (0) # move file cursor  
to initial position.
```

```
print ("The current position is")  
print (F1.tell ())
```

```
# get concurrent  
position of file
```

Assignment NO-01

Q-1. Explain the working of gear box with neat sketch.

Gear box receives the power from engine through clutch and transmits the power

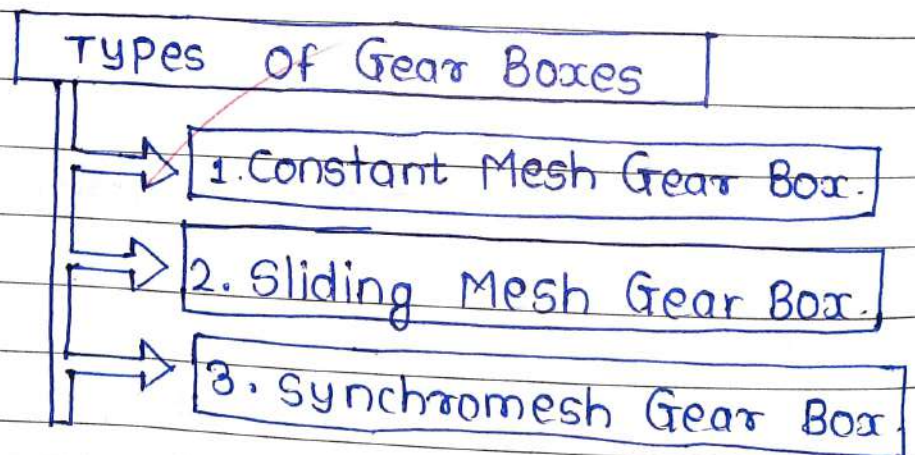

to the propeller shaft. In gear box, torque is increased and speed is reduced. Gear box produces different speed range for the vehicle.

* function of Gear Box :-

- ①. Gear box reduces the speed increases the torque.
- ②. Gear box provides wide range of speeds and torque to the vehicle.
- ③. With reverse gear, gear box provides the mean to move the vehicle in reverse direction.
- ④. In neutral position, the gear box disconnects the I.C. engine from the wheel even with the clutch in the engaged position.

* Types of Gear Boxes.

Three types of gear boxes are used in automobile vehicles :

The synchromesh gear box is used in four wheelers. It is improved version of

constant mesh gear box. The working principle of automobile box is explained with the help of constant mesh gear box.

* Components of Constant Mesh Gear Box

- 1). Input Shaft.
- 2). Output Shaft.
- 3). Lay Shaft.
- 4). Gears ($A_1, A_2, B_1, B_2, C_1, C_2, D_1, D_2, I$)
- 5). Dog Clutch (S_1, S_2)
- 6). Gear Shifting Mechanism.

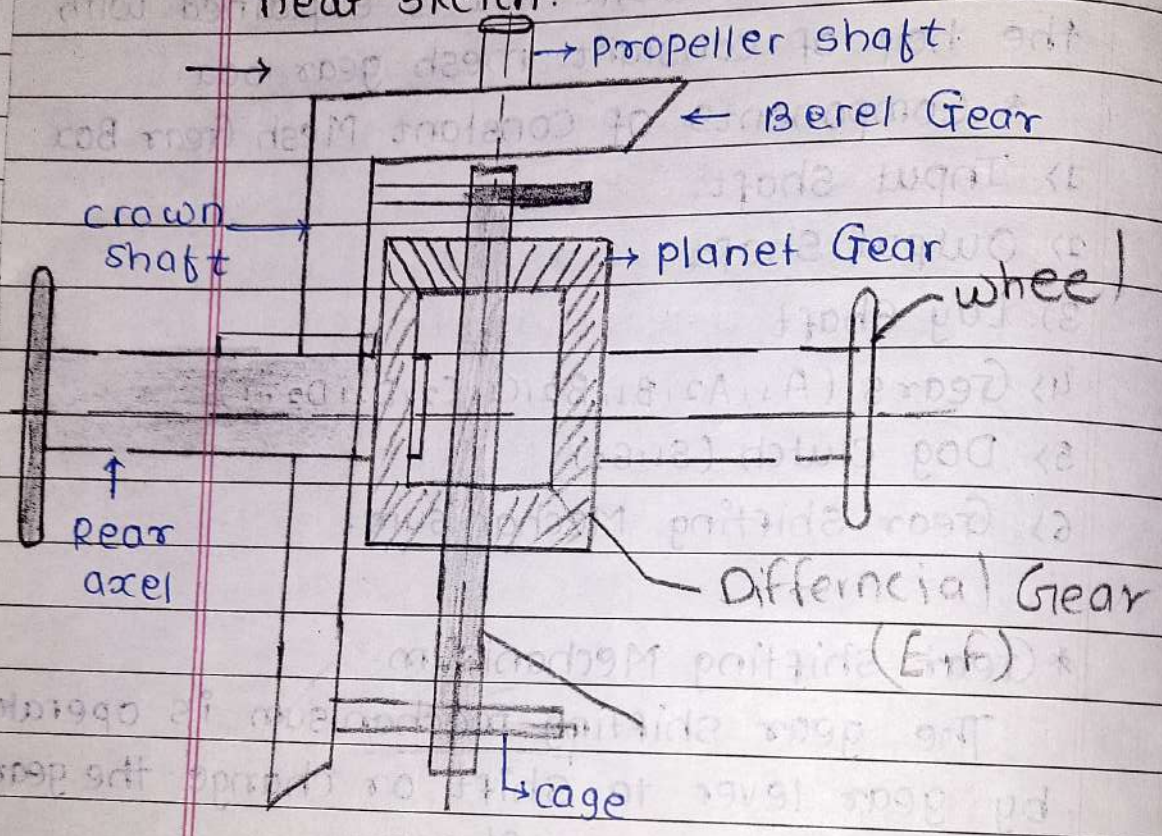

* Gear shifting Mechanism.

The gear shifting mechanism is operated by gear lever to shift or change the gear type of Gear -

- ① Ist gear
- ② IInd gear
- ③ IIIrd gear
- ④ Reverse gear.

* Working of Gear :- The input gears are fixed on the countershaft, making it a single unit. It drives the individual gears on the main shaft, which rotate freely on the bearings. Thus, the gearbox passes the drive to the wheels depending upon the gear which engages on the main-shaft.

Q-2. Explain the working of differential with neat sketch.

- 1) Differential gear box transmits the power from the propeller shaft or rear axle.
- 2) The shaft of rear axle is at right angles to the propeller shaft or rear axle.
- 3) The differential gear box allows the two wheels to rotate at different speeds when vehicle is taking the turn.
- 4) The differential gear box increases the torque and reduces the speed from propeller shaft to rear axle shaft.

The various components of differential gear box are as follows -

* Components of Differential Gear Box -

- ① pinion A.
- ② Crown Gear B
- ③ Differential pinion C and D.
- ④ Differential Gears E and f.
- ⑤ Arms and spindle.

the differential gear box in which the bevel gear A known as pinion is keyed to the propeller shaft. A drives the bevel gear B known as crown gear. This crown gear B rotates freely on rear axle p.

Two axel equal gears E and f known as differential gears are keyed on two separate axel p and Q respectively.

* Working :- These differential gears are in mesh with two equal differential pinions C and D known as potential differential pinion.

The differential pinions C and D can rotate freely on the spindle provided on the arms which are attached to the crown gear B.

When the automobile runs on a straight path, the differential gears E and f and differential pinions C and D acts as one unit and rotates with the crown gear B. Hence, the differential gears E and f rotate with the same speed and in the same

direction as that of crown gear B.
There is no relative motion betⁿ C, D, E.
The differential pinion C and D do not rotate about their own axes.

When automobile is taking right turn, the inner rear wheel should have lesser speed than the outer rear wheel. Due to relative speed of the inner and outer differential gears F and E, the pinion C and D start rotating about the spindle axis and at the same time revolve about the rear axle axis also.

Due to this epicycle effect, the speed of the inner rear wheel is decreased by a certain amount and the speed of outer rear wheel increases by the same amount.

Assignment 2 (CO-2)

- Q1. a) Compare the magnetic circuit with the electric circuit. (4 or 6 marks)
- b) A steel ring of mean diameter of 50 cm is wound with 500 turns on it. A flux density of 1 Tesla is produced in the ring by mmf of 4000 AT/m. Calculate magnetising current. Also find the current when an air gap of 1mm is cut in it. Keeping $B = 1$ Tesla in the ring. (6 marks)
- Q2.a) Explain the phenomenon of self and mutually induced e.m.f. (6 marks)
- b) If a coil of 150 turns is linked with a flux of 0.01 wb when carrying current of 10 A, calculate :
- self inductance of the coil
 - if this current is uniformly reversed in 0.1 sec, calculate induced emf.
 - if a second coil of 100 turns is uniformly wound over the first coil, find mutual inductance between them. (6 marks)
- Q3. a) Derive the expression for energy stored in a magnetic field and hence derive the expression for energy stored per unit volume (6 marks)
- b) Obtain an expression for coefficient of coupling K for the magnetic circuits. (6 Marks)

* Assignment No. :- 2 *

Q.1] ~~Def~~ Compare magnetic and electric circuit?

⇒ Electric Circuit	Magnetic Circuit
① The Flow of current is in the electric circuit and current is physical.	① the flow of flux is in magnetic circuit and flux is imaginary.
② Resistance is the opposition to flow of current.	② Reluctance is opposition to flow of flux.
③ It is measured in ohms (Ω).	③ It is measured in AT/Wb.
④ Conductance is reciprocal of resistance.	④ Permeance μ is the reciprocal of reluctance.
⑤ The unit of conductance is Ω^{-1} (mho).	⑤ The unit of permeance is Wb/AT.
⑥ Here $I = V/R$.	⑥ Here $\Phi = \text{mmf}/S$.
⑦ Resistance depends upon nature of conductivity material (length).	⑦ Reluctance varies inversely according to permeability of medium. ($1/\mu$).
⑧ In this current density = I/A $\frac{\text{Amp}}{\text{m}^2}$	⑧ In this flux density = Φ/A $\frac{\text{Wb}}{\text{m}^2}$
$S = I/A$	$B = \Phi/A$

Q.2] Define mmf, flux, flux density, magnetic intensity, reluctance, right hand thumb rule, mutual inductance, self inductance, coefficient of coupling?

⇒ ① Magnetomotive Force (mmf) :-

Page No. _____

It is defined as the force behind the flow of flux or the production of flux is called as mmf.

② Flux density :-

It can be defined as the flux per unit area in a plane at right angle / perpendicular to the surface is known as magnetic flux density [B].

$$B = \frac{\Phi}{A} \text{ Wb/m}^2$$

③ Magnetic intensity :-

the force experienced by a unit north pole when placed at any point in a magnetic field is called as magnetic intensity [H].

④ Flux :-

The total number of lines of force existing in a particular magnetic field is called as magnetic flux. Its unit is Weber. [Wb]

⑤ Reluctance :-

The opposition to the flow of current is called as reluctance. [S]

$$\therefore S = \frac{\text{mmf}}{\Phi} = \frac{N \cdot I}{\Phi} \text{ AT/Wb}$$

⑥ Right Hand Thumb Rule :-

Hold the solenoid in the right hand such that the curved fingers point in the direction of the current through the conductor then the point thumb along

axis of the solenoid point in the direction of north pole or in the direction of the magnetic field.

⑦ Mutual Inductance :-

Any change in current through a coil 'A' produces emf in the coil 'B'. This is called mutual inductance.

⑧ Self inductance :-

The coil opposes the change in current this property is called as self inductance.

⑨ Coefficient of coupling :-

$$K = \sqrt{K_1 K_2}$$

K , is called as the coefficient of coupling.

Q.3] Derive an expression for energy stored in a magnetic circuit

⇒ If the current flowing through the coil increases by ' dI ' amperes in ' dt ' seconds, the self induced emf in the coil is given by,

$$e = -\frac{dI}{dt} \text{ volts.}$$

This emf opposes the rise in current. Hence to overcome this opposition the source has to supply energy. The amount of source voltage required to overcome or neutralise the self induced emf is $(-e)$ volts.

Amount of source voltage to overcome the induced emf $= V = (-e)$ volts.

The energy supplied by the source and stored by the coil during time d 'dt' is

$$E = \text{Power} \times \text{time}$$

$$\therefore E = V \times I \cdot dt$$

But,

$$V = -e$$

$$\therefore E = (-e) \cdot I \cdot dt$$

$$\text{But } e = -L \frac{dI}{dt}$$

$$\therefore E = (-e) \cdot \left(-L \frac{dI}{dt} \right) \cdot I \cdot dt$$

$$\therefore E = L \cdot dI \cdot I \text{ joules} \quad \text{--- (1)}$$

This is the energy stored when the current change is only 'dI' amperes.

But actually the current changes from 0 to I. Hence to obtain the corresponding energy stored we have to integrate equation (1).

$$\text{Total stored energy, } E = \int_0^I L \cdot I \cdot dI$$

$$= L \left[\frac{I^2}{2} \right]_0^I$$

$$= \frac{LI^2}{2} \text{ Joules}$$

$$\therefore \boxed{E = \frac{1}{2} LI^2} \text{ Joules.}$$

Q.4] An iron ring of mean ~~circu~~ circumference of 50 cm has an air gap of 2 mm. It has diameter circular cross section area is 5 cm^2 . The number of turns is 600. Relative permeability is 580. If coil carries current of 2 A. Find flux in air gap?

$$\Rightarrow \text{Given: } l = 50 \text{ cm} = 50 \times 10^{-2} \text{ m}$$

$$N = 600$$

$$a = 5 \text{ cm}^2 = 5 \times 10^{-4} \text{ m}^2$$

$$I = 2 \text{ A}$$

$$\text{air gap} = 2 \text{ mm} = 2 \times 10^{-3} \text{ m}$$

Solution:-

$$l_i = l - l_g$$

$$= 50 \times 10^{-2} - 2 \times 10^{-3}$$

$$l_i = 49.8 \times 10^{-2} \text{ m}$$

Now,

$$\Phi S_T = \frac{1}{\mu_0 \mu_r} \left[\frac{l_i}{\mu_r} + l_g \right]$$

$$= \frac{1}{4 \times 3.14 \times 10^{-7} \times 580} \left[\frac{0.498}{580} + 2 \times 10^{-3} \right]$$

$$= \frac{2.85 \times 10^{-3}}{62.8 \times 10^{-11}}$$

$$\mu S_T = 0.455 \times 10^8$$

$$S_T = 4.55 \times 10^6 \text{ AT/Wb.}$$

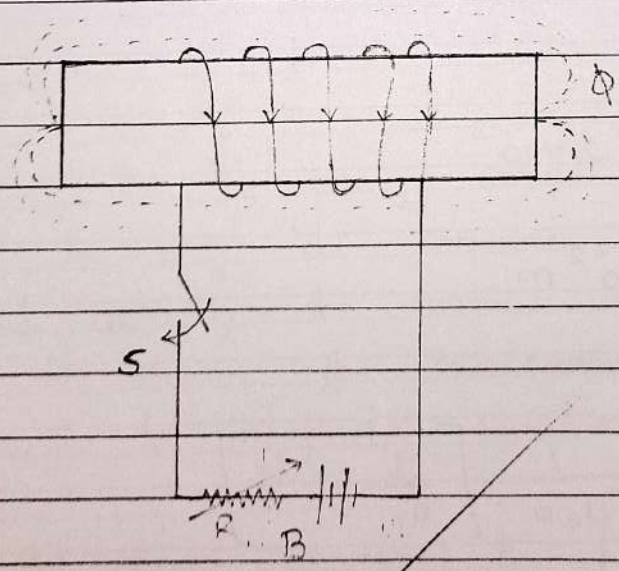

Now,

$$\Phi = \frac{NI}{S} = \frac{600 \times 2}{4.55 \times 10^6}$$

$$\Phi = 2.63 \times 10^{-4} \text{ Wb.}$$

Q.5] short note on self induced emf and mutually induced emf ?

⇒ @ self induced emf :-

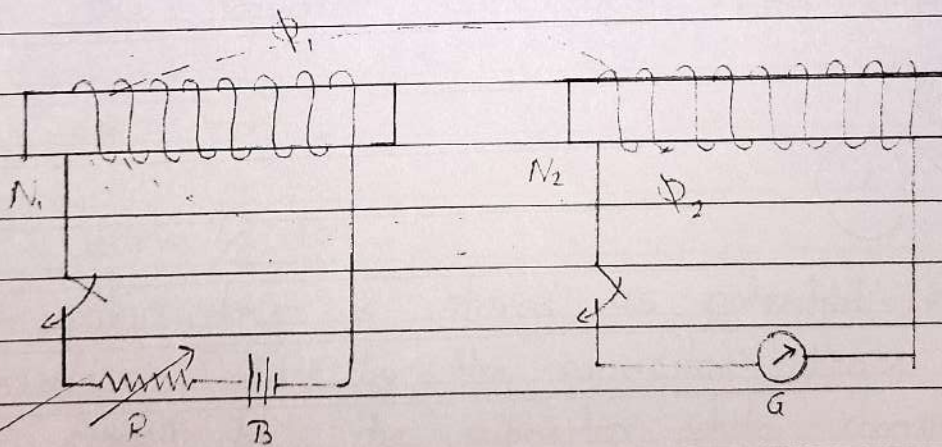

The setup consists of a coil wound on a magnetic core a battery with the variable resistance 'R' is used to adjust the current flowing through the coil due to this current flux lines are

produced which form a complete loop and are said to be linked with the coil. If the flux is Φ and the flux linkage with the coil is ' $N\Phi$ ' where ' N ' is the total number of turns due to change in flux, then emf in the coil is induced by the "Faraday's law" of electromagnetic induction. This emf is called self induced emf. This will last till the change in current takes place.

The coil opposes the change in current, this property is called self inductance.

(b) Mutual induced emf :-

Any change in current through a coil 'A' produces emf in coil 'B'. This is called mutual induction.

Two coils A & B are placed near each other. Coil A consists of N_1 turns and coil B consists of N_2 turns. A switch and variable resistances are connected in the circuit consisting of coil A whereas a galvanometer is connected in the circuit coil B to sense the current I_2 . Due to battery, the current I_1

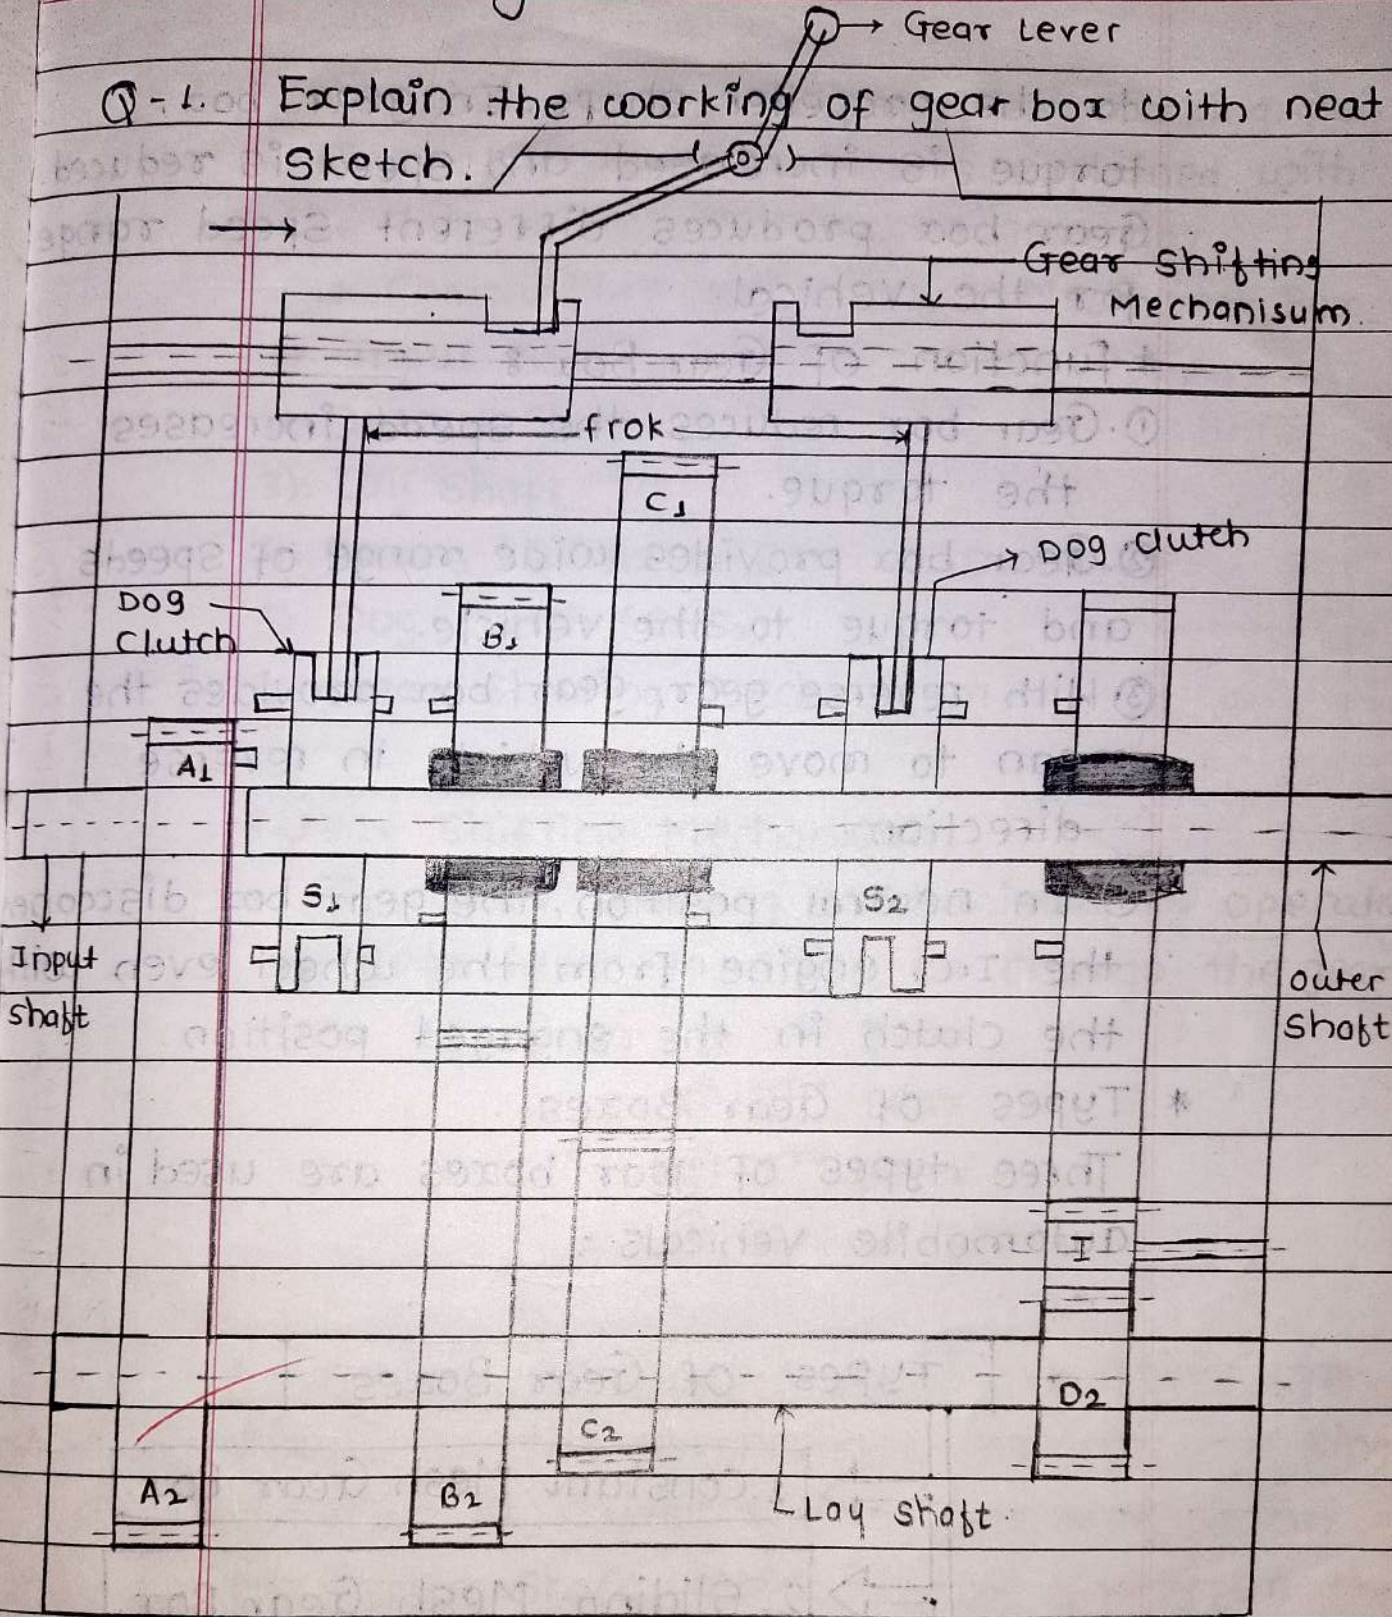

starts flowing through coil A. This current can be changed by changing the value of resistance 'R' due to the current I_1 flowing through coil A flux is produced which is denoted as ' Φ_1 '. A part of this flux complete its path through coil B as shown in the figure. This flux ' Φ_2 ' is called mutual flux. If we change I_1 through coil A by changing the resistance 'R', Φ_1 will change. This will change Φ_2 .

Due to this emf will start flowing through the coil B, which is sensed by galvanometer 'G'. Thus if flux is produced by the coil A gets linked with the coil B and due to the change in the emf this flux in coil A an emf is induced in the coil B.

Assignment NO-01

Q-1. Explain the working of gear box with neat sketch.

Gear box receives the power from engine through clutch and transmits the power

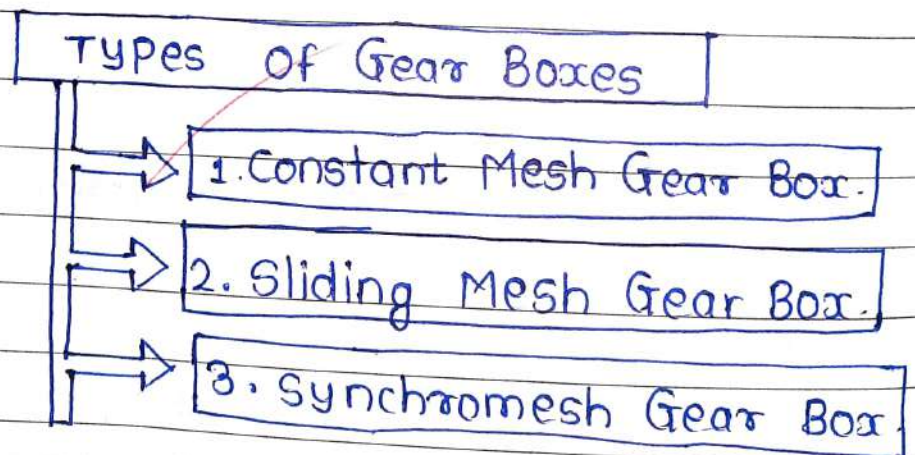

to the propeller shaft. In gear box, torque is increased and speed is reduced. Gear box produces different speed range for the vehicle.

* function of Gear Box :-

- ①. Gear box reduces the speed increases the torque.
- ②. Gear box provides wide range of speeds and torque to the vehicle.
- ③. With reverse gear, gear box provides the mean to move the vehicle in reverse direction.
- ④. In neutral position, the gear box disconnects the I.C. engine from the wheel even with the clutch in the engaged position.

* Types of Gear Boxes.

Three types of gear boxes are used in automobile vehicles :

The synchromesh gear box is used in four wheelers. It is improved version of

constant mesh gear box. The working principle of automobile box is explained with the help of constant mesh gear box.

* Components of Constant Mesh Gear Box

- 1). Input Shaft.
- 2). Output Shaft.
- 3). Lay Shaft.
- 4). Gears ($A_1, A_2, B_1, B_2, C_1, C_2, D_1, D_2, I$)
- 5). Dog Clutch (S_1, S_2)
- 6). Gear Shifting Mechanism.

* Gear shifting Mechanism.

The gear shifting mechanism is operated by gear lever to shift or change the gear

type of Gear - ① Ist gear

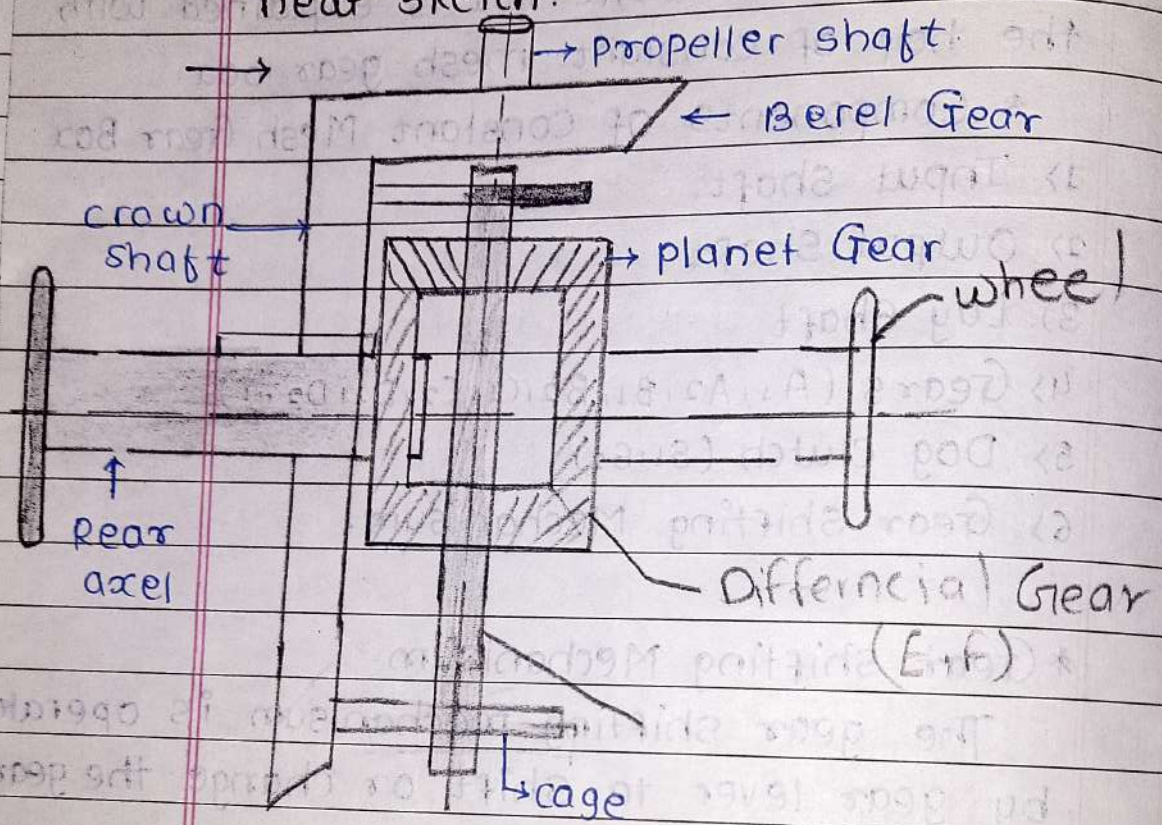

② IInd gear

③ IIIrd gear

④ Reverse gear.

* Working of Gear :- The input gears are fixed on the countershaft, making it a single unit. It drives the individual gears on the main shaft, which rotate freely on the bearings. Thus, the gearbox passes the drive to the wheels depending upon the gear which engages on the main-shaft.

Q-2. Explain the working of differential with neat sketch.

- 1) Differential gear box transmits the power from the propeller shaft or rear axle.
- 2) The shaft of rear axle is at right angles to the propeller shaft or rear axle.
- 3) The differential gear box allows the two wheels to rotate at different speeds when vehicle is taking the turn.
- 4) The differential gear box increases the torque and reduces the speed from propeller shaft to rear axle shaft.

The various components of differential gear box are as follows -

* Components of Differential Gear Box -

- ① pinion A.
- ② Crown Gear B
- ③ Differential pinion C and D.
- ④ Differential Gears E and f.
- ⑤ Arms and spindle.

the differential gear box in which the bevel gear A known as pinion is keyed to the propeller shaft. A drives the bevel gear B known as crown gear. This crown gear B rotates freely on rear axle p.

Two axel equal gears E and f known as differential gears are keyed on two separate axel p and Q respectively.

* Working :- These differential gears are in mesh with two equal differential pinions C and D known as potential differential pinion.

The differential pinions C and D can rotate freely on the spindle provided on the arms which are attached to the crown gear B.

When the automobile runs on a straight path, the differential gears E and f and differential pinions C and D acts as one unit and rotates with the crown gear B. Hence, the differential gears E and f rotate with the same speed and in the same

direction as that of crown gear B.
There is no relative motion betⁿ C, D, E.
The differential pinion C and D do not rotate about their own axes.

When automobile is taking right turn, the inner rear wheel should have lesser speed than the outer rear wheel. Due to relative speed of the inner and outer differential gears F and E, the pinion C and D start rotating about the spindle axis and at the same time revolve about the rear axle axis also.

Due to this epicycle effect, the speed of the inner rear wheel is decreased by a certain amount and the speed of outer rear wheel increases by the same amount.

09/10/2020 

Assignment 2 (CO-2)

- Q1. a) Compare the magnetic circuit with the electric circuit. (4 or 6 marks)
- b) A steel ring of mean diameter of 50 cm is wound with 500 turns on it. A flux density of 1 Tesla is produced in the ring by mmf of 4000 AT/m. Calculate magnetising current. Also find the current when an air gap of 1mm is cut in it. Keeping $B = 1$ Tesla in the ring. (6 marks)
- Q2.a) Explain the phenomenon of self and mutually induced e.m.f. (6 marks)
- b) If a coil of 150 turns is linked with a flux of 0.01 wb when carrying current of 10 A, calculate :
- self inductance of the coil
 - if this current is uniformly reversed in 0.1 sec, calculate induced emf.
 - if a second coil of 100 turns is uniformly wound over the first coil, find mutual inductance between them. (6 marks)
- Q3. a) Derive the expression for energy stored in a magnetic field and hence derive the expression for energy stored per unit volume (6 marks)
- b) Obtain an expression for coefficient of coupling K for the magnetic circuits. (6 Marks)

* Assignment No. :- 2 *

Q.1] ~~Def~~ Compare magnetic and electric circuit?

⇒ Electric Circuit	Magnetic Circuit
① The Flow of current is in the electric circuit and current is physical.	① the flow of flux is in magnetic circuit and flux is imaginary.
② Resistance is the opposition to flow of current.	② Reluctance is opposition to flow of flux.
③ It is measured in ohms (Ω).	③ It is measured in AT/Wb.
④ Conductance is reciprocal of resistance.	④ Permeance μ is the reciprocal of reluctance.
⑤ The unit of conductance is Ω^{-1} (mho).	⑤ The unit of permeance is Wb/AT.
⑥ Here $I = V/R$.	⑥ Here $\Phi = \text{mmf}/S$.
⑦ Resistance depends upon nature of conductivity material (length).	⑦ Reluctance varies inversely according to permeability of medium. ($1/\mu$).
⑧ In this current density = I/A $\frac{\text{Amp}}{\text{m}^2}$	⑧ In this flux density = Φ/A $\frac{\text{Wb}}{\text{m}^2}$
$S = I/A$	$B = \Phi/A$

Q.2] Define mmf, flux, flux density, magnetic intensity, reluctance, right hand thumb rule, mutual inductance, self inductance, coefficient of coupling?

⇒ ① Magnetomotive Force (mmf) :-

Page No. _____

It is defined as the force behind the flow of flux or the production of flux is called as mmf.

② Flux density :-

It can be defined as the flux per unit area in a plane at right angle / perpendicular to the surface is known as magnetic flux density [B].

$$B = \phi/A \text{ Wb/m}^2$$

③ Magnetic intensity :-

the force experienced by a unit north pole when placed at any point in a magnetic field is called as magnetic intensity [H].

④ Flux :-

The total number of lines of force existing in a particular magnetic field is called as magnetic flux. Its unit is Weber. [Wb]

⑤ Reluctance :-

The opposition to the flow of current is called as reluctance. [S]

$$\therefore S = \text{mmf}/\phi = N \cdot I / \phi \text{ AT/Wb}$$

⑥ Right Hand Thumb Rule :-

Hold the solenoid in the right hand such that the curved fingers point in the direction of the current through the conductor then the point thumb along

axis of the solenoid point in the direction of north pole or in the direction of the magnetic field.

⑦ Mutual Inductance :-

Any change in current through a coil 'A' produces emf in the coil 'B'. This is called mutual inductance.

⑧ Self inductance :-

The coil opposes the change in current this property is called as self inductance.

⑨ Coefficient of coupling :-

$$K = \sqrt{K_1 K_2}$$

K , is called as the coefficient of coupling.

Q.3] Derive an expression for energy stored in a magnetic circuit

⇒ If the current flowing through the coil increases by ' dI ' amperes in ' dt ' seconds, the self induced emf in the coil is given by,

$$e = -\frac{dI}{dt} \text{ volts.}$$

This emf opposes the rise in current. Hence to overcome this opposition the source has to supply energy. The amount of source voltage required to overcome or neutralise the self induced emf is $(-e)$ volts.

Amount of source voltage to overcome the induced emf $= V = (-e)$ volts.

The energy supplied by the source and stored by the coil during time d 'dt' is

$$E = \text{Power} \times \text{time}$$

$$\therefore E = V \times I \cdot dt$$

But,

$$V = -e$$

$$\therefore E = (-e) \cdot I \cdot dt$$

But $e = -L \frac{dI}{dt}$

$$\therefore E = (-e) \cdot \left(-L \frac{dI}{dt} \right) \cdot I \cdot dt$$

$$\therefore E = L \cdot dI \cdot I \text{ joules} \quad \text{--- (1)}$$

This is the energy stored when the current change is only 'dI' amperes.

But actually the current changes from 0 to I. Hence to obtain the corresponding energy stored we have to integrate equation (1).

$$\text{Total stored energy, } E = \int_0^I L \cdot I \cdot dI$$

$$= L \left[\frac{I^2}{2} \right]_0^I$$

$$= \frac{LI^2}{2} \text{ Joules}$$

$$\therefore \boxed{E = \frac{1}{2} LI^2} \text{ Joules.}$$

Q.4] An iron ring of mean ~~circu~~ circumference of 50 cm has an air gap of 2 mm. It has diameter circular cross section area is 5 cm^2 . The number of turns is 600. Relative permeability is 580. If coil carries current of 2 A. Find flux in air gap?

$$\Rightarrow \text{Given: } l = 50 \text{ cm} = 50 \times 10^{-2} \text{ m}$$

$$N = 600$$

$$a = 5 \text{ cm}^2 = 5 \times 10^{-4} \text{ m}^2$$

$$I = 2 \text{ A}$$

$$\text{air gap} = 2 \text{ mm} = 2 \times 10^{-3} \text{ m}$$

Solution:-

$$l_i = l - l_g$$

$$= 50 \times 10^{-2} - 2 \times 10^{-3}$$

$$l_i = 49.8 \times 10^{-2} \text{ m}$$

Now,

$$\Phi S_T = \frac{1}{\mu_0 \mu_r} \left[\frac{l_i}{\mu_r} + l_g \right]$$

$$= \frac{1}{4 \times 3.14 \times 10^{-7} \times 580} \left[\frac{0.498}{580} + 2 \times 10^{-3} \right]$$

$$= \frac{2.85 \times 10^{-3}}{62.8 \times 10^{-11}}$$

$$\mu S_T = 0.455 \times 10^8$$

$$S_T = 4.55 \times 10^6 \text{ AT/Wb.}$$

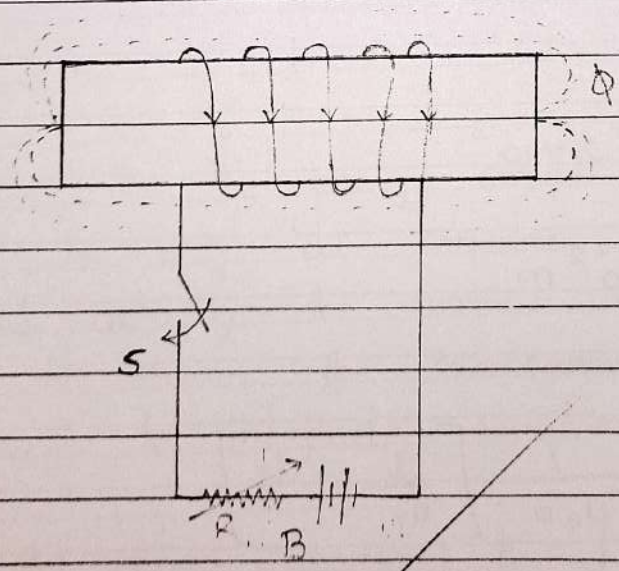

Now,

$$\Phi = \frac{NI}{S} = \frac{600 \times 2}{4.55 \times 10^6}$$

$$\Phi = 2.63 \times 10^{-4} \text{ Wb.}$$

Q.5] short note on self induced emf and mutually induced emf ?

⇒ @ self induced emf :-

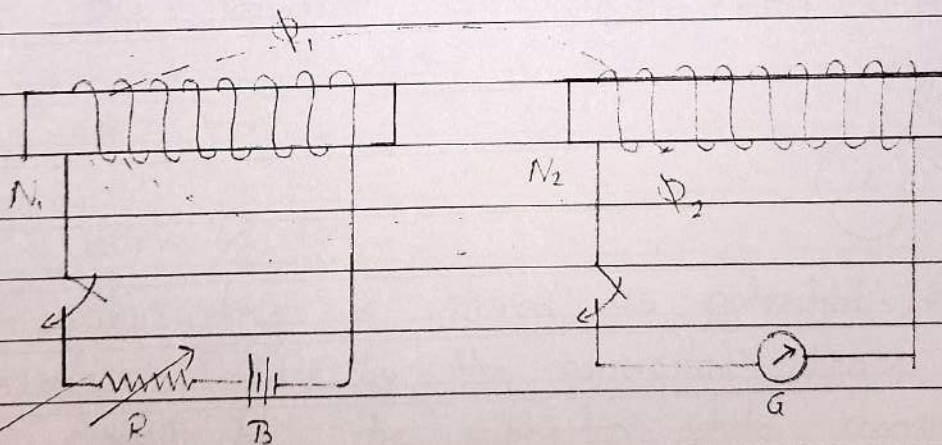

The setup consists of a coil wound on a magnetic core a battery with the variable resistance 'R' is used to adjust the current flowing through the coil due to this current flux lines are

produced which form a complete loop and are said to be linked with the coil. If the flux is Φ and the flux linkage with the coil is ' $N\Phi$ ' where ' N ' is the total number of turns due to change in flux, then emf in the coil is induced by the "Faraday's law" of electromagnetic induction. This emf is called self induced emf. This will last till the change in current takes place.

The coil opposes the change in current, this property is called self inductance.

(b) Mutual induced emf :-

Any change in current through a coil 'A' produces emf in coil 'B'. This is called mutual induction.

Two coils A & B are placed near each other. Coil A consists of N_1 turns and coil B consists of N_2 turns. A switch and variable resistances are connected in the circuit consisting of coil A whereas a galvanometer is connected in the circuit coil B to sense the current I_2 . Due to battery, the current I_1

starts flowing through coil A. This current can be changed by changing the value of resistance 'R' due to the current I_1 flowing through coil A flux is produced which is denoted as ' Φ_1 '. A part of this flux complete its path through coil B as shown in the figure. This flux ' Φ_2 ' is called mutual flux. If we change I_1 through coil A by changing the resistance 'R', Φ_1 will change. This will change Φ_2 .

Due to this emf will start flowing through the coil B, which is sensed by galvanometer 'G'. Thus if flux is produced by the coil A gets linked with the coil B and due to the change in the emf this flux in coil A an emf is induced in the coil B.
